## Training Course: Designing and Analyzing Financial Data Using Microsoft Excel

Training Course code: FI235186 From: 27 - 31 May 2024 Venue: London (UK) - Landmark Office Space - Oxford Street  
Training Course Fees: 5250 € Euro

### Introduction:

This training course will discuss the specific skills related to dealing with spreadsheet software such as "MS Excel" and database management software like "MS Access." It will cover how to use these programs in the development and design of electronic accounting applications, as well as how to acquire specialized skills for using these programs in the analysis of accounting data and information. This includes analyzing financial statements to evaluate the financial and managerial performance of an organization and providing financial information to aid in managerial decision-making. The course will also cover financial planning, budgeting, and honing practical application skills.

### Program Objectives:

By the end of the training program, participants will be able to:

- Design accounting systems using MS Access.
- Enhance accounting work through computerization.
- Utilize MS Excel for financial planning.
- Expand their practical skills in using computers to improve professional performance in various accounting aspects.

### Target Audience:

This program is aimed at:

- Accountants and bookkeepers.
- Managers and heads of financial departments looking to deepen their understanding of accounting concepts and methods.
- Non-financial managers and other individuals who use financial information for decision-making or provide reports to senior management.
- Financial managers.
- Audit managers.
- Financial planning managers and accounting heads.
- Financial controllers and other financial affairs personnel.

- Anyone seeking to develop their skills and experience in this field.
