Introduction

This program provides an in-depth overview of the "Fast Close" process, which is the ability of a modern, global organization to rapidly close the accounting books, collect, consolidate and, then, publish its financial statements. This process is widely viewed not only as an indicator of management's abilities to execute its strategic plan in light of the availability of fast, reliable financial information, but also a proxy for good, well-implemented corporate governance. This program will also review the mounting concerns and evidence that the "Fast Close" process, after a long period of sustained improvement, is now in a period of decline, due in large part to the impact of compliance, new accounting and reporting standards and the sheer increase in the volume and complexity of financial information that needs to be consolidated and reviewed.
