## Training Course: Legal Aspects of Central Bank Digital Currency: Central Bank and Monetary Law Considerations

Training Course code: SC234938 From: 30 September - 11 October 2024 Venue: London (UK) - Landmark Office Space - Oxford Street Training Course Fees: 9240 € Euro

### Introduction

This training program analyzes the legal foundations of central bank digital currency CBDC under the central bank and monetary law. Absent strong legal foundations, the issuance of CBDC poses legal, financial, and reputational risks for central banks. While the appropriate design of the legal framework will up to a degree depend on the design features of the CBDC, some general conclusions can be made. First, most central bank laws do not currently authorize the issuance of CBDC to the general public. Second, from a monetary law perspective, it is not evident that "currency" status can be attributed to CBDC. While the central bank law issue can be solved through rather straightforward law reform, the monetary law issue poses fundamental legal policy challenges.

This training course will highlight:

- The current policy goals and challenges of CBDC.
- The Concept, Design Features, and Legal Implications
- The Legal Risks Associated with CBDCs and cross-border payments
- The Regulations around the World for CBDCs
- Advantages, challenges, and risks of CBDC
- Central banks laws and monetary law reforms

### Training program Objectives

By the end of this training course, you will be able to:

- Understand the working principle of CBDCs, and their advantages and disadvantages.
- Know the policy goals and challenges of CBDC projects.
- The legal implications of CBDCs and their features and concepts.
- Determine the Legal Risks Associated with CBDCs, as a property decentralizes status and its risks.
- Know the different regulations from central banks around the world.
- Determine the need for Central bank law reform and monetary law reform to organize the CBDCs.

### Training Methodologies

This training course will be a combination of brief presentations, round table discussions, and brainstorming group sessions.

Participants will have a chance to look closer at how to embed banking and technology and to work together on formulating legal aspects of Central Bank Digital Currency. Finally, participants will compete to create a new CBDC based on the guidelines and laws discussed during the workshop.

### Target Audience

This course is specifically designed for lawyers, reform makers, and managers of any banking, financial institution, or related regulatory authority.
