Training Course: International Safety Management Code and Designated Person Ashore

Training Course code: MM234702 From: 28 April - 2 May 2024 Venue: Amman (Jordan) - Chemistry Training Course Fees: 4200 € Euro

Introduction

This course has been designed by ISM experts to meet with the criteria of the IMO Guidelines contained in Circular MSC - MEPC.7 Circ. 6 19 October 2007, but it has also been developed with much practical knowledge of both the shipping industry and the legal issues that surround the role of the DPA.

The aim of the course is to provide knowledge, understanding and proficiency necessary to understand ISM code and also to provide training for all DPAs and those preparing to become DPAs so that they can fully understand their responsibilities and roles of this important position with respect to full compliance with the ISM Code.

Course Objectives of International Safety Management Code and Designated Person Ashore

- Provide the key requirements and benefits of the ISM Code
- Offer the knowledge and skills required in accordance with the guidance and recommendation given by the IMO MSC-MEPC.7/circ.6
- Deliver the training necessary for the application and maintenance of a company's Safety Management Code.
- Have an extended knowledge and understanding of the ISM Code
- Understand the background and objectives of the Code
- Gain knowledge on the applicable codes, guidelines and standards as appropriate and the relevant mandatory rules and regulations
- Define the resulting requirements for the company's SMS
- Understand the responsibilities and authority of the DPA, possible legal exposure, as well as other potential difficulties
- Take the duties of a DPA as defined in IMO MSC - MEPC.7 Circ. 6 provided you are qualified according to this circular
- Provide documentary evidence as a DPA proving that you are capable to undertake the necessary duties
- Understand the assessment techniques of examining, questioning, evaluating and reporting
- Have guidance for participation in a marine-related management system audit

- Have adequate knowledge of shipping and shipboard operations
- Apply the technical and operational aspects of their Safety Management System
- Carry out effective communications with shipboard staff and senior management
- Know the related requirements included STCW 2010 and MLC 2006 for better understanding of ISM effect
