Conference: Continuous Reliability Improvement (CRI)

Conference code: CO8066 From: 16 - 20 September 2024 Venue: London (UK) - Landmark Office Space - Oxford Street
Conference Fees: 5775 € Euro

Introduction

Benchmarking studies on various oil refineries around the world by Solomon Associates have shown that rotating equipment accounts for more than 20% of all maintenance and inspection costs. In addition, rotating equipment is often at key nodes of the process and is frequently critical to production. Therefore failure would lead to unacceptable downtime costs.

This conference aims to provide delegates with a comprehensive understanding of how to use a combined predictive and preventive maintenance approach coupled with proper failure monitoring to achieve maximum reliability and performance from rotating equipment.

Conference Objectives of Continuous Reliability Improvement CRI

This seminar is an in-depth treatment of the major factors that have to be considered in order to assess and improve the reliability of machinery. It has been designed to illustrate fundamental reliability concepts without having to resort to complex mathematics. Its purpose is to bridge the gap between the rather theoretical subject of "Reliability Engineering" and day-to-day equipment maintenance practice by emphasizing the common goals of reliability and maintenance.

At the end of this seminar participants will be able to:

- Apply the proven methodologies and templates which are introduced
- Focus on key areas of reliability
- Understand the nature of failure and how this affects the performance of rotating equipment
- Make the right maintenance choices for strategic equipment
- Reduce the impact of plant downtime
- Unlock the true potential of all of their people

Conference Process of Continuous Reliability Improvement CRI

The program is delivered in a combination of lecture-style and computer-based training. In addition, a significant amount of time is set aside for small working group activity when addressing case study problems. Extensive use is made of case study material to underline the key aspects of the course and to give the delegates exposure to current best practice.

Conference Outlines of Continuous Reliability Improvement CRI

Day 1: Understanding the link between Reliability and competitive advantage

- Definition of Reliability
- Probability of failure
- Reliability metrics
- Strategic Importance of Reliability

- Assessing current performance
- Making the right strategic choices

Day 2: Using reliability modeling to establish inherent reliability

- Basic modeling building blocks
- Deterministic models
- Probabilistic models
- Markov chains
- Monte Carlo models
- Case study examples

Day 3: Understanding the nature of failures in order to make the best response

- Origins of failure
- Failure types
- Six common patterns
- Analyzing failure patterns
- Weibull analysis
- Maintenance tasks

Day 4: Optimising your failure management to ensure that maintenance is cost-effective

- Risk assessment & criticality
- Equipment functions
- Functional failures
- Failure modes and effects analysis
- Failure consequences
- Maintenance task selection
- Producing a practical maintenance plan

Day 5: Setting up a continuous reliability improvement process in order to improve performance

- Assessing the improvement potential versus the costs
- Obtaining senior management support
- Establishing the project framework
- Technical aspects
- Human considerations
- Likely results

Registration form on the Conference: Continuous Reliability Improvement (CRI)

Conference code: CO8066 From: 16 - 20 September 2024 Venue: London (UK) - Landmark Office Space
- Oxford Street Conference Fees: 5775 € Euro

Complete & Mail or fax to Global Horizon Training Center (GHTC) at the address given below

Delegate Information

Full Name (Mr / Ms / Dr / Eng):
