Introduction:

Organizations that are project-driven are faced with the challenge of effective management of inter-dependent, varied priority, varied value, multi-players, shared-resources, short and long term, multiple-accountability, shared-authority, variable risk level, and dynamic projects. Therefore, it is not enough to deliver get projects. Leaders are now focusing on the effectiveness of whole organizations, and the delivery of a web of changing and interacting projects to achieve the aims of their organizations. This calls for a systematic management approach for the successful delivery of those projects.
