Training Course: Implementing Business Process Improvement

Training Course code: MA9315 From: 10 - 21 June 2024 Venue: London (UK) - Landmark Office Space - Oxford Street
Training Course Fees: 8400 € Euro

Introduction

Business Process Improvement is the cornerstone of optimizing business processes that better serve your organization's customers. Process improvement drives cost reduction, accelerated performance, and improved customer service. Business runs on process and process runs the business. This course explores business process improvement techniques and how to apply them to your organizational processes, outlining key tasks and steps needed for process improvement, and defining the success factors for business process improvement efforts and projects. Our business process improvement model is practical, simple and straight forward, providing a methodology neutral approach for greater process improvement success. Attendees will easily apply the skills and techniques learned in this course back on the job with practical hands-on examples to bring process improvement theory and techniques into the real world.

Course Objectives:

- Define business process Improvement
- Understand the need for business process improvement
- Understanding techniques for business process documentation
- Getting comfortable with documenting the right level of process improvement
- Understand the process improvement steps
- Process metric definition, data collection, analysis, and reporting
- Understand when and when not to pursue the potential improvement
- Visualization of the process of the current state and potential outcomes
- Prioritization of process improvement activities to set expectations
- Realize process improvements and measurement of their success

Target Audience :

Process analysts, business analysts, project managers, business process owners, general business staff, and anyone who needs the skills to improve and/or manage business processes.
