Training Course: Problem Solving & Decision-Making Best Practices

Training Course code: MA234586 From: 18 - 22 November 2024 Venue: Kuala Lumpur (Malaysia) - Royale Chulan Kuala Lumpur Training Course Fees: 5250 € Euro

Introduction

We are continuously confronted with problems that require us to make decisions. Most decisions are reached without requiring any complex decision-making process: We're hungry? We decide to eat. Some problems are more complex, like deciding how to prioritize our work, or understanding why a process failed and deciding what to do about it; these require a rational approach to problem-solving. Often, things get even more complicated, or our decisions could have an important impact on our lives, careers or the lives of those around us; that is where we must have the ability to think critically and make sure there is no flaw in our logic. At other times the problem is so unusual that it defies rational and critical thinking; these are the times where creative problem solving becomes an invaluable tool.

In this course, we will cover all these important thinking approaches. After understanding the thinking mechanisms, we will provide you with methods and tools that you will practice during the sessions and that can help you at work or in life, and from the most mundane situations to the most difficult or unusual ones.

Course Objectives:

- Build and expand decision making, critical thinking, and creative problem-solving skills
- Apply logical and creative approaches to solving problems and making decisions
- Use traditional and creative tools for identifying causes and generating solutions
- Employ creativity and lateral thinking as business tools
- Analyze and solve actual problems facing them at work
- Demonstrate and build credibility with upper management
- Develop strategic approaches to problem-solving and decision making

Target Audience

Business professionals who want to take their critical thinking to the next level by using both their experience and intuition to make the right moves and decisions, and Managers, supervisors, and administrators who will benefit from better problem solving and decision-making skills.

Target Competencies:

- Evaluating options
- Problem-solving ability and anticipating potential problems
- Attention to details
- Situation analysis
- Balanced decision making
- Practical and proactive thinking
- Creativity
- Intuitive decision making
