Training Course: Governance and Management of IT services

Training Course code: IT235168 From: 3 - 14 June 2024 Venue: Casablanca (Morocco) - New Hotel Training Course
Fees: 7480 € Euro

Introduction

In today's rapidly evolving digital landscape, effective Governance and Management of IT Services are paramount for organizations seeking to thrive and remain competitive. IT governance ensures that IT investments align with strategic objectives, while IT service management ITSM guarantees the delivery of high-quality IT services that meet customer and business needs. This comprehensive training program has been designed to equip IT professionals and leaders with the essential knowledge and skills to successfully navigate the complex realm of IT governance and ITSM.

Objectives

By the end of this program, participants will:

- Understand IT Governance: Gain a deep understanding of IT governance frameworks, principles, and best practices, and appreciate their significance in modern organizations.
- Master ITSM: Explore the core concepts of IT service management, including the ITIL framework, to enhance service delivery and customer satisfaction.
- Manage IT Risks: Learn how to identify, assess, and mitigate IT-related risks effectively, ensuring the resilience and security of IT services.
- Align IT with Business Goals: Develop the skills necessary to align IT strategies and services with the broader objectives and strategies of the organization.
- Establish Policies and Quality Standards: Create robust IT policies and procedures while implementing and maintaining high-quality IT services.
- Drive Continuous Improvement: Implement continuous improvement practices in IT service delivery, enhancing efficiency and customer-centricity.
- Prepare for Real-World Challenges: Gain practical insights and problem-solving skills through case studies and interactive exercises, enabling participants to apply their learning in real-world scenarios.

Target Audience

This program is designed for a diverse range of IT professionals, including but not limited to:

- IT Managers and Directors: Seeking to improve their organization's IT governance and service management practices.
- IT Governance Officers: Responsible for ensuring compliance and alignment of IT with business objectives.
- IT Service Managers: Focused on optimizing service delivery and customer satisfaction.
- IT Risk Managers: Involved in identifying and mitigating IT-related risks.
- Business Analysts: Looking to bridge the gap between business needs and IT solutions.
- IT Consultants: Wishing to deepen their knowledge and provide more valuable insights to clients.

- IT Practitioners: Working in various IT roles and seeking to enhance their skills and career prospects.
- Anyone interested in understanding IT governance and IT service management, regardless of their current job roles.
