Training Course: Finance & Accounting for the Oil & Gas Industry

Training Course code: EN6009 From: 23 - 27 June 2024 Venue: Sharm El-Sheikh (Egypt) - Sheraton Sharm Hotel Training Course Fees: 4850 € Euro

Introduction

This program will provide you with a solid foundation in the financial aspects of oil and gas exploration and production E&P. It will have immediate and practical application back at your workplace since all activities have financial implications for the assets, departments and ultimately the company for which you conduct your specialist activities. This five-day program has been designed specifically for non-finance specialists in the oil and gas industries who need to understand the financial implications of the work they do. You will learn how to:

- Understand how your activities and decisions are reflected in your company's reporting to shareholders and other stakeholders
- Find out what happens to financial and economic data that is provided by you and your departmental colleagues
- Raise your level of confidence in working with financial information and interactions with commercial colleagues
- Prepare yourself for increased responsibility and a more strategic role in the management of your company

Objectives

- appreciate the financial impact of your day-to-day decisions and actions
- work more confidently and effectively with colleagues on financial matters
- improve the quality of information you receive from and provide to Finance
- increase the success rate of requests for authorization of expenditure and make more effective use of funds allocated
- use departmental budgets and monthly management reports to help you exercise financial control of your area of operations
- understand the financial information disclosed in your company's annual report and accounts
- Learning throughout the program will be reinforced by case studies, worked examples, and illustrative extracts from oil and gas company annual reports

Methodology

The program uses training methods chosen to ensure effective learning, to reinforce understanding, to develop

practical skills and to promote the critical evaluation of information. Interest is maintained throughout each session using a variety of formats, including:

- lively illustrated presentations on the industry context and the accounting, reporting and measurement issues
- worked examples, exercises, and solutions demonstrating the practical application of each topic
- illustrative extracts from the annual reports of international companies
- opportunities for questions and discussion on relevant issues raised by participants

Summary

The program begins with a review of the business environment and an overview of E&P activities. The rest of Day 1 is devoted to understanding the economic analysis used in making E&P project decisions.

Day 2 covers the essentials of accounting and financial reporting, including the components of a balance sheet, the measurement of profit and the distinction between capital and operating expenditures. With this foundation, the rest of Day 2 and Day 3 examine the accounting and reporting treatment of exploration, development and production costs, including the treatment of dry wells, depreciation, tests for impairment of assets and provision for removal and restoration costs decommissioning.

Day 4 deals with the financial implications of arrangements used to manage the high risks and costs that are characteristic of the E&P industry - joint ventures, farm-outs, carried interests, production sharing contracts and long-term gas contracts.

Day 5 applies the financial accounting and reporting knowledge gained on the program to the analysis of financial statements, providing an essential framework for assessing the performance of your company and its competitors and for making effective use of the budgets and management reports with which the program concludes.

Outlines

Day 1:

The E&P Business and Project Economics

The Business Environment

- Business objectives
- Stakeholders
- Corporate governance

The E&P Business

- Risk and reward

- Commercial arrangements
- The field life cycle
