Training Course: Techniques and Best Practices in Contract Drafting, Review, and Analysis

Training Course code: PC235108 From: 30 September - 4 October 2024 Venue: Geneva (Switzerland) - Training Course
Fees: 5250 € Euro

Introduction

Contracting is one of the most essential regulated formats in life, as it organizes people's relationships with each other to meet their various needs and achieve their different interests. Contracting refers to an agreement between two parties to achieve a specific goal that can be legally executed. If both parties fulfill the terms of this agreement, there will be no problem, and each party will obtain their rights from the other party.

The value of a contract and the judgment of its accuracy and intricacy are evident when a dispute arises, and we resort to the agreed-upon specialized entities to resolve this dispute. The term "drafting" generally refers to the proper organization to highlight the content. The term includes two essential elements: form and content. Each complements the other because without good organization, the content becomes difficult to understand, and without good content, there will be no significant benefit from the organization.

In this training course, we will focus on the optimal approach, the best organization, and precise coordination, as well as the legal provisions that regulate contract drafting from both scientific and practical perspectives.

Objectives

By the end of the course, participants will be able to:

- Identify the essential elements of contract writing.
- Apply best practices in drafting contract texts and various sections while recognizing common errors.
- Describe the fundamental steps in preparing contracts, including formulating an effective scope for terms, conditions, and strategic sources.
- Evaluate the procedures of contract preparation and the effective selection of contractors through evaluative standards.
- Assess the impact of negotiation on contractual terms and the written scope in the initial stage.

Target Audience

- Legal department managers and members.
- Procurement and contract managers.
- All employees responsible for preparing and writing the scope of work and negotiating contractual terms.
- All professionals involved in the pre-contracting phase.

- Employees with a role in determining the best contracting strategy, decision sources, and tenders.
