Training Course: Advanced IPSAS for Governmental Accounting Systems

Training Course code: FI235117 From: 25 November - 6 December 2024 Venue: Casablanca (Morocco) - New Hotel
Training Course Fees: 6800 € Euro

Introduction:

Governmental accounting has recently gained significant importance in contemporary societies. It plays a crucial role in the financial management of countries, as well as in formulating and implementing financial policies to contribute to the activation of the role of public financial management of the state. Its importance is also highlighted in serving the government's administrative or political apparatus. The significance of governmental accounting has emerged as a response to the changes in societies, particularly the expansion of services and activities provided by the government. Reports and financial statements have become vital in economic planning, financial operation control, and evaluation of governmental financial operations by specific entities. This reflects the role of financial policies and economic management. Financial policies have become more focused on achieving economic stability due to the role of governmental accounting as an essential system for providing information to measure revenues, expenses, and their effectiveness. Governmental accounting in the public sector has long relied on cash basis until the beginning of the 1990s. Researchers, professional and academic organizations have increasingly shown interest in transitioning and shifting to an accrual basis. This transition aimed to bring governmental accounting closer to financial accounting. The result of this interest was the issuance of international governmental accounting standards known as IPSAS, adopted by many countries.

Objectives:

By the end of the training program, participants will be able to:

1. Understand basic accounting concepts and the flow of accounting data through the accounting system.
2. Learn methods for recording, posting accounting entries, and conducting inventory reconciliations.
3. Acquire skills in applying accrual-based accounting procedures, identifying period-specific expenses and revenues.
4. Develop skills in closing accounts, preparing financial statements, and budgets.

Target Audience:

1. Senior management staff.
2. Financial managers.
3. Administrative and financial development committees.
4. Financial planning managers.
5. Financial accountants.

6. Anyone interested in improving their skills and sees the need for this course.
