Training Course:
Data Analysis and Visualization with Microsoft
Power BI - Nanodegree Program

9 - 13 June 2024
Dubai (UAE)
Residence Inn by Marriott Sheikh Zayed Road, Dubai

Training Course:
Data Analysis and Visualization with Microsoft Power BI - Nanodegree Program

Training Course code: IT235023 From: 9 - 13 June 2024 Venue: Dubai (UAE) - Residence Inn by Marriott Sheikh Zayed Road, Dubai Training Course Fees: 4565 ⏹ Euro

Introduction:

In today's data-driven world, organizations are collecting more data than ever before. The ability to analyze and visualize this data has become critical for businesses to make informed decisions and gain a competitive advantage. Microsoft Power BI is a powerful data analysis and visualization tool that can help businesses to gain insights and improve decision-making. This training program aims to provide participants with a comprehensive understanding of Power BI and its features, as well as practical experience in using Power BI to analyze and visualize data.

Objectives:

- Understand the fundamentals of data analysis and visualization

- Learn how to use Microsoft Power BI for data analysis and visualization

- Develop the skills to create effective data visualizations and reports

- Understand how to manage and share data visualizations and reports using Power BI

- Gain hands-on experience with real-world data analysis and visualization projects

Target Audience:

This training program is designed for anyone interested in data analysis and visualization using Microsoft Power BI, including data analysts, business analysts, and decision-makers.

Outlines:

Day 1:

Introduction to Data Analysis and Visualization with Microsoft Power BI

- Overview of data analysis and visualization

- Introduction to Power BI and its features

- Understanding data sources and data models

- Connecting data sources to Power BI

Day 2:

Creating Data Visualizations and Reports with Power BI

- Creating visualizations with Power BI

- Designing effective data visualizations and reports

- Formatting and customizing data visualizations

- Adding interactivity to data visualizations

Day 3:

Advanced-Data Analysis and Visualization Techniques with Power BI

- Advanced visualization techniques in Power BI

- Data modeling and DAX calculations

- Working with advanced features like filters, slicers, and drill-through

- Sharing and publishing data visualizations and reports

Day 4:

Practical Applications of Data Analysis and Visualization with Power BI

- Working with real-world data sets

- Creating custom visuals and dashboards

- Developing data analysis and visualization solutions

- Troubleshooting common issues and errors

Day 5:

Project and Assessment

- Applying the knowledge and skills gained throughout the program

- Creating a final data analysis and visualization project

- Assessment and feedback
