Training Course: Professional Facilities Management

Training Course code: MA235199 From: 3 - 14 March 2025 Venue: Rome (Italy) - Training Course Fees: 8400 € Euro

Introduction:

Professional facility management is vital to ensure the productivity of any facility or institution. This management bears the responsibility of maintaining all necessary facilities for daily operations and ensuring their continuous availability. In this training course, we will explore the fundamental concepts of professional facility management and present several effective practices for managing facilities correctly and strategically.

Program Objectives:

By the end of the course, participants will be able to:

- Understand facility management.
- Analyze strategic options and make necessary decisions for facility management.
- Identify the tools and techniques needed for engineering design development and decision-making regarding automation and disaster recovery.
- Recognize the importance of proper maintenance management and facility project management.
- Apply project management techniques to handle large-scale facility tasks.
- Utilize capital budgeting concepts and techniques to ensure the best decisions regarding facilities.

Target Competencies:

This training course is designed for individuals working in facility management, including:

- Architectural engineers.
- Building managers.
- Maintenance and service professionals.
- Those interested in professional facility management.

Target Audience:

The target audience for this course includes a diverse range of institutions and companies, including:

- Industrial enterprises.

- Government institutions.
- Private and public companies.
- Sports clubs.
