### Introduction

The ability to negotiate is one of the basic commercial business requirements yet it is often delegated to those least able to produce an effective outcome. The impact of poor negotiation is therefore felt throughout an organization and has an immediate negative effect on company profitability.

This seminar provides practical, experience-based guidance in planning and conducting a successful negotiation and identifies on an individual basis the key competencies and skills required to emerge on the winning side.

- Each day involves the delegate in a specific negotiating scenario
- The focus is upon achieving a "win-win" outcome but recognizes that all negotiations are not conducted with this result in mind.
- The emphasis is placed upon good planning and preparation to assure an effective negotiated result. Fail to plan and you plan to fail!
- Common tactics and countermeasures are explored and Negotiation "traps" uncovered
