## Conference: Human Error Analysis & Prevention

Conference code: CO8258 From: 2 - 6 June 2025 Venue: Kuala Lumpur (Malaysia) - Royale Chulan Kuala Lumpur  
Conference Fees: 5775 € Euro

### Introduction

Human errors refer to the environmental, organizational, and job factors, and human and individual characteristics which influence the behavior at work in a way which can affect an organization's health and safety performance. A simple way to view human error is to think about three aspects: the job, the individual, and the organization and how they interact to impact on health and safety-related human behavior.

After an accident involving human failure - using human error analysis tools can identify the causes and contributing human error factors. Establishing these underlying causes of an accident/incident is the key to preventing similar human error accidents/incidents.

This course is aimed at providing delegates with the practical on-site knowledge and skills to develop and successfully implement effective human error analysis techniques.

### Conference Objectives of Human Error Analysis & Prevention

Participants attending the conference will:

- Explain the various human error analysis techniques and how they can be used
- Show how human behavior can lead to human errors and incidents/accidents
- Provide practical ideas and methods for observing and preventing human errors
- Review practical case studies to show how other organisations have used human error analysis techniques to prevent human errors in the workplace

### Conference Methodology

Delegates will learn by active participation through inspiring presentation tools and interactive techniques presented in a lively, enthusiastic, and interesting style. Delegates will take part in practical human error analysis exercises and group discussions, as related to their own organization's workplace activities.
