Landmark Office Space - Oxford Street*

## Training Course: Operation, Diagnostics and Maintenance for Oil & Gas

Training Course code: MI6058 From: 27 January - 7 February 2025 Venue: London (UK) - Landmark Office Space  
- Oxford Street Training Course Fees: 9240 € Euro

### Introduction

This five-day program develops an essential understanding of Oil & Gas Exploration & Production E&P accounting, reporting, and performance measurement issues and practices. It develops your ability to prepare, use, and critically evaluate information on E&P activities, applying specialist industry knowledge and relevant analytical skills.

- The program is designed specifically for those who have a basic understanding of accounting but who need to understand more about accounting and financial reporting policies and practices in the upstream oil and gas industry.
- Topics covered include the successful efforts and full cost methods of accounting, the classification of assets as tangible or intangible, the unit of the production method for depreciation of capitalized costs, the testing for impairment of oil and gas assets, and accounting for removal and restoration of oil and gas facilities.
- The main requirements of Generally Accepted Accounting Principles GAAP and International Financial Reporting Standards IFRS relevant to the Oil & Gas Exploration & Production industry are examined for each major phase in the field life cycle.
- Learning throughout the course is achieved through illustrated presentations, group discussions, worked examples, exercises, and solutions, and extracts from published financial statements of international companies.
- Participants in this program gain a broader and deeper appreciation of the role of the E&P Finance Department and the context in which it operates, encouraging a more confident and proactive approach to their work, developing awareness of issues, and preparing them for increased responsibility.

### Course Objectives of Operation, Diagnostics, and Maintenance for Oil & Gas

By the end of the program, delegates will learn how to:

- Develop an understanding of the accounting standards, policies and practices used by companies in the Oil & Gas Exploration & Production industry
- Appreciate the nature and financial implications of Production Sharing Contracts and other agreements between host governments and international companies
- Examine issues and guidelines in accounting for Joint Ventures
- Identify and know how to apply international and national accounting standards most relevant to the E&P industry
- Improve the relevance and reliability of financial reports to better meet the needs of users
- Review and use publicly available information for benchmarking the business performance of companies in the E&P industry

### Course Methodology of Operation, Diagnostics and Maintenance for Oil & Gas

Each topic on this course is introduced with an illustrated presentation on the activities to be accounted for, the methods used, and the issues arising in the financial reporting of those activities. Learning on each topic is

developed by a worked example, and participants then complete an exercise, individually or in groups as appropriate, to ensure that they are able to apply what they have learned. On completion of each exercise, a full solution is issued and discussed, with an opportunity for questions and answers. Having mastered the theory and practice of each issue, learning is further reinforced by an examination of relevant extracts from the annual reports of international oil and gas companies. At the end of each day, participants have an opportunity for a one-to-one session with the course leader to ask further questions and to go over any material that they have not yet fully understood.

## Organizational Impact of Operation, Diagnostics and Maintenance for Oil & Gas

- More effective Finance support for front-line departments
- Greater relevance and reliability of financial and management information
- More strategic thinking and focus on performance
- More effective use of financial statements of the company, its co-venturers, and its competitors
- The ability of Finance managers and staff to work with less supervision
- Preparation of Finance staff for increased responsibility

## Personal Impact of Operation, Diagnostics, and Maintenance for Oil & Gas

- A better understanding of the context and importance of the work you do
- Greater awareness of industry practices, problems and solutions
- Increased understanding and assurance to complete tasks successfully
- Increased self-confidence and motivation at work
- Greater job satisfaction in providing quality support to management
- Greater ability to supervise, develop and motivate colleagues
