Training Course: Financial forecasting and preparation of budgets and financial reports

Training Course code: FI235459 From: 19 - 23 January 2025 Venue: Dubai (UAE) - Training Course Fees: 4150 € Euro

Introduction:

The program will discuss the skills related to handling spreadsheet programs such as "MS Excel" and database management programs such as "MS Access" and how to use these programs in developing and designing electronic accounting applications. Participants will acquire skills in using these programs to analyze accounting data and information, analyze financial statements to evaluate the financial and administrative performance of the organization, and provide financial information that assists in making managerial decisions. Additionally, the program will cover using these programs for financial planning and designing budget plans.

The program will also aim to enhance participants' skills and knowledge in all aspects of financial planning and analysis, budget planning both planning and control aspects, and providing specialized professional advice to help them understand and analyze issues related to performance measurement and evaluation for improvement and refinement purposes.

Program Objectives:

By the end of the training program, participants will be able to:

- Measure the success of financial management.
- Provide financial information to assist in making managerial decisions.
- Conduct financial planning and analysis and understand both planning and control aspects of budgeting.
- Analyze strengths and weaknesses in the financial position.
- Understand and analyze issues related to performance measurement and evaluation for improvement purposes.
- Analyze risks through the analysis of various financial risks.
- Understand financial planning and its importance.
- Understand the overall framework of the comprehensive current budget.
- Use Excel for financial planning.
- Design accounting systems using Access.
