

Conference: Lean Six-Sigma Green Belt Certification Programme

2 - 6 June 2025 Casablanca (Morocco) New Hotel

Conference: Lean Six-Sigma Green Belt Certification Programme

Conference code: CO8055 From: 2 - 6 June 2025 Venue: Casablanca (Morocco) - New Hotel Conference Fees: 4675

Euro

Introduction

This high impact conference skillfully trains the participant to become certified as a Lean Six-Sigma Green Belt. This certification enhances professional core competencies in World-Class business processes. Additionally, participants are better qualified to increase operational effectiveness, engage employees, reduce operating expenses, improve industry reputation, and leverage business excellence. Customer value creation awareness is a prime element of this unique training initiative.

In these hands-on learning experiences, you will:

- Understand how to deploy the potential of Lean Six-Sigma as a strategic business tool.
- Learn the basics of Lean Processing and Six-Sigma applications to focus on the reduction of operational costs.
- Learn to maximize profits by reducing process variation and expanding operational control and stability.
- Re-define your perception of <code>Inormal</code> to <code>Iexcellent</code> with the skillful application of Lean Six-Sigma tools.

□Upon successful completion of this world-class high-impact program, which includes all established certification skill points of Lean Six-Sigma Body of Knowledge, participants would receive Lean Six-Sigma Green Belt Certification □

Conference Objectives of Lean Six-Sigma Green Belt Certification

Participants attending this program will:

- Enhance their understanding of the basic level Lean Six-Sigma process.
- Learn to successfully deploy Six-Sigma into current business operations for effectiveness through teamwork.
- Learn the basics of Lean Six-Sigma methodology, statistical analysis, and its analytical integration into the business process.
- Learn to integrate the principles of Lean Six-Sigma to establish process control and minimize process variation, subsequently, reducing operational costs.
- Develop their understanding of the skills and behaviors required to fully deploy Lean Six-Sigma into your organization.

Conference Methodology of Lean Six-Sigma Green Belt Certification

This high impact training and development is a proven blend of Lean Six-Sigma theory, lecture, hands-on classroom exercises and video programs to facilitate the learning experience.

This is a highly interactive prorgarm which involves the participant in every level. We <code>[]</code> learn by doing <code>[]</code> in a safe classroom environment. This is <code>[]</code> hands-on, common-sense <code>[]</code> learning in which we skillfully utilize proven elements of contemporary adult learning theory.

M a n y o f t h e e x e r c i s e s examples from all types of business processes to make this training more applicable to the participant \mathbb{R}^n work

environment.

Organisational Impact of Lean Six-Sigma Green Belt Certification

The organization will benefit from Six-Sigma integration by having more money returned to working capital. This is facilitated by the reduction of process errors and a more stable process. Subsequently, more time is available to the management team by reducing process variation. This will allow the organization to gain a competitive advantage with more accurate material flow and processing.

Personal Impact of Lean Six-Sigma Green Belt Certification

Delegates attending this programme gain a deeper appreciation and understanding of Six-Sigma methodology and the skillful application of this World-Class concept. Additionally, Six-Sigma deployment enhances the managerial skill set and professional competency of the participant.

Conference Outlines of Lean Six-Sigma Green Belt Certification

Day 1: Understanding the strategic power of Six-Sigma Methodology

- VOC, stakeholders & process owners, CTQ elements
- The basis of Six-Sigma; history and development; Understanding DMAIC process
- Strategic concepts & benefits of Benchmarking
- Six-Sigma deployment: DMAIC Concept
- Tollgate concept for Six-Sigma organizational functionality
- The power of data analysis in organization effectiveness and clarification
- Concepts of the Kano Analysis Ithree key elements of customer awareness
- Six Sigma in action. Project charters Six-Sigma project integration
- The impact of lean process and Six Sigma, the perfect algorithm
- Do It Yourself Six-Sigma The application of Project Templates
- Defining Timelines and Deliverables a clear project game plan
- · The focus on value creation in business processes
- Speed and Accuracy Blending proven processing concepts
- Quality function deployment QFD for business operations
- Six Sigma as a Strategic Strategy and a Measurement of organizational quality
- Data-driven decision making@removing subjectivity in business decisions
- Key Metrics & Drivers for Organizational effectiveness market share
- · World-Class Transformation to enhance competitiveness
- Kano analysis; three levels of customer responsiveness

Day 2: Six-Sigma Deployment for organization effectiveness

- Calculation: The costs of poor quality: COPQ; Understanding ROI
- Attribute and Continuous Data recognizing the differences for application
- Descriptive and Inferential statistics knowing when to use what
- Histograms. Measures of central tendency normal statistical distributions
- Normal Distributions, Standard Scores, Z tables
- Student st-Tests, statistical degrees of freedom
- Process Capability a voice of the process; central tendency of the data set
- Statistical Mean, Median & Mode; Calculation of Sigma Failure Rates; DPMO

- Microsoft Excel & Minitab Statistical Software Applications
- Process Base Line; Data Collection Plan
- Y= f x Matrix; Identification of KPIV
- Graphing Discrete & Continuous Data; software interface
- Graphing Discrete & Continuous Data; software interface
- Population & Sample data; [], x, s, & []
- Central Limit Theorem, confidence intervals
- Hypothesis Testing for the mean, Type I & Type II Errors, alpha risks
- Process Capability, 1- 1/2 [] drift
- Process Tolerance, Measures of Dispersion, central tendency, Cp & Cpk,
- Statistical natural process Limits & Customer Specification Limits: LCL & UCL
- Bivariate data analysis in Six-Sigma applications
- Gauge R&R; Measurement Systems Analysis MSA

Day 3: Concepts of Lean Processing

- · History of Lean Manufacturing
- Lean Analysis: transformation from current state to future state
- Cycle Time Compression; improving process throughput
- Supply Chain Acceleration
- Value Stream Mapping; focus on value creation: value chain identification
- Muda: Identifying Seven Types of Wastes
- Muri: Work complexity & fatigue factors
- Mura: Focus on Process Flow; Roll Throughput Yield RTY
- 5S concepts for workplace organization & effectiveness
- Visual controls, Poka Yoke concept; prevention/detection/mitigation
- SMED Concepts to speed up processes
- Team dynamics, Team conflict: forming, storming, norming, performing
- SIPOC Diagrams; three levels of Process maps, flowcharts

Day 4: Blending Lean Principles in Business All Processes

- Standardized Work Applications to maximize efficiency and reduce variation
- Batch & Queue vs. Single element processing
- · Kanban Inventory operational systems
- Understanding the Theory of Constraints
- Total Productive Maintenance TPM for operational costs reduction
- The effective integration of RFID/bar codes
- Employee Empowerment for organizational effectiveness/Kaizen interface *
- · Point of Use Supply
- · Quality at the Source
- Green Process Integration
- Six-Sigma project work/team dynamics and interaction
- Cause & Effect Diagrams: Ishikawa/fishbone chart Analysis
- FMEA Matrix applications for Six-Sigma; calculating the RPN
- Production Balance: The Importance of TAKT Time Awareness
- Project tools: Gantt charts, critical path method CPM & PERT evaluation
- Brainstorming for Results, Pareto Analysis 80/20 Analysis*
- Improving the Process for effectiveness; Lean process & Six-Sigma Integration
- High-level Green Analysis
- Ishikawa Diagrams, Brainstorming, Pareto 80/20
- Brainstorm for Project Benefits integration of team dynamics: the Five whys

Day 5: Skillfully Applying the Tools of Six-Sigma for success

- Tools to speed analysis finding the root cause of variation
- Measuring and tracking improvement; Establishing Process Baseline
- Hold the line... standardization/optimization
- Tools to prioritize improvement opportunities
- · Successful ways to define and mitigate failure modes
- FMEA Diagrams in Action how to identify process trouble spots
- Project Closure; Control plans that WORK!
- Continued workplace training...SOP for success planning for success;
- Innovative Six-Sigma deployment opportunities
- SPC; Monitoring Systems, Locking the Learning
- Control Chart Utilization; Juran, Deming, & Shewhart
- Lean Six-Sigma Certification Test Pass: 80%

Registration form on the Conference: Lean Six-Sigma Green Belt Certification Programme

Conference code: CO8055 From: 2 - 6 June 2025 Venue: Casablanca (Morocco) - New Hotel Conference

Fees: 4675 [Euro

Complete & Mail or fax to Global Horizon Training Center (GHTC) at the address given below
