Kigali (Rwanda)*

Training Course: PMI-PBA Exam Preparation

Training Course code: PC234936 From: 13 - 17 January 2025 Venue: Kigali (Rwanda) - Training Course Fees: 5950 € Euro

Introduction:

Analysis is a critical skill in terms of both business and project execution. The concepts, tools, and techniques are widely applicable and sufficiently robust, in that they can be applied to nearly every industry, microvertical, and even personal life. Having held various positions in business for over 20 years, I cannot begin to stress strongly enough the importance of business analysis and the Project Management Institute's Professional in Business Analysis PMI-PBA® credential. For a moment, consider the cartoon below, which was adopted for this book based on a March 1973 University of London Computer Center Newsletter and then put online on September 9, 2003, in a blog titled "Typical Project Life"; it metaphorically explains the gaps between business requirements and execution.

PERSONAL IMPACT

The delegates will have the following benefits from attending this training course:

- Becoming an expert in PBA
- Gaining confidence and professional insights needed
- Applying best practices
- Obtaining a world-renown professional certification in PBA.
- Passing the PBA examination could boost the earning potential by developing project skills
