

*Training Course:  
Global VSAT Forum Satellite*

*10 - 14 February 2025  
London (UK)  
Landmark Office Space - Oxford Street*

## Training Course: Global VSAT Forum Satellite

Training Course code: SC235011 From: 10 - 14 February 2025 Venue: London (UK) - Landmark Office Space  
- Oxford Street Training Course Fees: 6000 € Euro

### Introduction

Global VSAT Forum Satellite is an industry association that represents the global satellite industry. The GVF is dedicated to promoting the development and use of satellite technology and services worldwide. This training program will provide an overview of the GVF Satellite division, its role in the satellite industry, and key topics related to satellite communications.

### Objectives:

- Understand the role of the GVF Satellite division in the satellite industry
- Learn about satellite communications technology and services
- Understand best practices for satellite network design, installation, and operation
- Learn about regulatory and policy issues related to satellite communications

### Target Audience

This training program is designed for professionals who work in the satellite industry or who are interested in learning more about satellite communications. This includes engineers, technicians, network operators, and others who are involved in designing, installing, and operating satellite networks.

### Outline:

#### Introduction to the GVF Satellite Division

- Overview of the GVF Satellite division and its mission
- Membership and governance structure of the GVF Satellite division
- GVF initiatives and programs related to satellite communications

#### Satellite Communications Technology and Services

- Overview of satellite technology and services
- Different types of satellite communications systems
- Satellite applications, including broadband, voice, and video

### Satellite Network Design, Installation, and Operation

- Best practices for satellite network design
- Installation and commissioning of satellite networks
- Satellite network operations and maintenance

### Regulatory and Policy Issues

- Overview of regulatory and policy issues related to satellite communications
- International agreements and organizations that impact satellite communications
- Emerging regulatory and policy issues, including spectrum allocation and space debris

### GVF Certification Programs

- Overview of GVF certification programs related to satellite communications
- Benefits of GVF certification for individuals and organizations
- Discussion of available GVF certification programs and requirements

### Conclusion

- Recap of key topics covered in the training program
- Discussion of future trends and developments in the satellite industry
- Next steps for further learning and engagement with the GVF and GVF Satellite division
