## Training Course: Microsoft Azure Administrator

Training Course code: IT234692 From: 14 - 18 September 2025 Venue: Dubai (UAE) - Residence Inn by Marriott Sheikh Zayed Road, Dubai Training Course Fees: 4900 € Euro

### Introduction

This training course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.

### Course Objectives

- How to secure identities with Azure Active Directory, and implement users and groups.
- Manage subscriptions and accounts, implementing Azure policies, and using Role-Based Access Control.
- What are the tools an Azure Administrator uses to manage their infrastructure?
- What are the basic virtual networking concepts like virtual networks and sub-netting, IP addressing, network security groups, Azure Firewall, and Azure DNS?
- Interstice connectivity features including VNet Peering, Virtual Network Gateways, and Site-to-Site Connections.
- Network traffic strategies including network routing and service endpoints, Azure Load Balancer, and Azure Application Gateway.
- Basic storage features including storage accounts, blob storage, Azure files and File Sync, storage security, and storage tools.
- Azure virtual machines including planning, creating, availability and extensions.
- How to administer server less computing features like Azure App Service, Azure Container Instances, and Kubernetes.
- Backing up files and folders, and virtual machine backups.
- Monitoring your Azure infrastructure including Azure Monitor, alerting, and log analytics.

### Target Audience

This course is for Azure Administrators. The Azure Administrator implements, manages, and monitors identity, governance, storage, compute, and virtual networks in a cloud environment. The Azure Administrator will provision, size, monitor, and adjust resources as appropriate.

## Prerequisites

- Successful Azure Administrators start this role with experience in virtualization, networking, identity, and storage.
- Understanding of on-premises virtualization technologies, including: VMs, virtual networking, and virtual hard disks.
- Understanding of network configurations, including TCP/IP, Domain Name System DNS, virtual private networks VPNs, firewalls, and encryption technologies.
- Understanding of Active Directory concepts, including users, groups, and role-based access control.
- Understanding of resilience and disaster recovery, including backup and restore operations.
