Training Course: Global VSAT Forum (GVF)

Training Course code: SC235010 From: 6 - 10 July 2025 Venue: Amman (Jordan) - Chemisty Training Course Fees: 3875
€ Euro

Introduction

The Global VSAT Forum GVF is a leading industry association that represents the global satellite industry. The GVF's mission is to promote the development and use of satellite technology and services around the world. This training program will provide an overview of the GVF and its role in the satellite industry, as well as cover key topics related to satellite communications.

Objectives:

- Understand the role of the GVF in the satellite industry
- Learn about satellite communications technology and services
- Understand best practices for satellite network design, installation, and operation
- Learn about regulatory and policy issues related to satellite communications

Target Audience

This training program is designed for professionals who work in the satellite industry or who are interested in learning more about satellite communications. This includes engineers, technicians, network operators, and others who are involved in designing, installing, and operating satellite networks.

Outline:

Introduction to the GVF

- Overview of the GVF and its mission
- Membership and governance structure of the GVF
- GVF initiatives and programs

Satellite Communications Technology and Services

- Overview of satellite technology and services
- Different types of satellite communications systems
- Satellite applications, including broadband, voice, and video

Satellite Network Design, Installation, and Operation

- Best practices for satellite network design
- Installation and commissioning of satellite networks
- Satellite network operations and maintenance

Regulatory and Policy Issues

- Overview of regulatory and policy issues related to satellite communications
- International agreements and organizations that impact satellite communications
- Emerging regulatory and policy issues, including spectrum allocation and space debris

Conclusion

- Recap of key topics covered in the training program
- Discussion of future trends and developments in the satellite industry
- Next steps for further learning and engagement with the GVF
