Training Course: Computer Skills For Sales Professional

Training Course code: SM234975 From: 29 September - 3 October 2025 Venue: London (UK) - Landmark Office Space - Oxford Street Training Course Fees: 5500 € Euro

Introduction

Sales professionals today must be adept in using technology to analyze sales data, manage customer relationships, and reach potential customers online. This training program provides Sales professionals with advanced computer skills that are essential for success in today's sales environment.

Objectives

The training program aims to equip Sales professionals with the following skills:

- Advanced Excel skills for data analysis and reporting
- Data visualization and presentation skills to effectively communicate sales data
- Proficiency in Customer Relationship Management CRM systems to manage customer data and automate sales processes
- Understanding of social media and online marketing techniques for reaching potential customers
- Knowledge of cybersecurity and data privacy best practices to protect customer data and mitigate cyber threats

Competencies

Upon completion of the training program, Sales professionals will be able to demonstrate the following competencies:

- Ability to analyze sales data using advanced Excel functions and formulas
- Proficiency in data visualization and presentation tools for communicating sales data to stakeholders
- Ability to manage customer data using a CRM system and automate sales processes
- Understanding of social media and online marketing techniques for reaching potential customers
- Knowledge of cybersecurity and data privacy best practices to protect customer data and mitigate cyber threats

Target Audience

- The training program is designed for Sales professionals who want to advance their computer skills.

- The program is suitable for Sales professionals of all levels, including sales managers, sales executives, and sales representatives.

Methodologies

- The training program will be delivered through a combination of lectures, practical exercises, and case studies.
- Participants will have access to training materials, including manuals, guides, and videos, to reinforce their learning.
- Participants will be expected to actively engage in the training program and complete practical exercises to apply their knowledge.
