Training Course: Logistics & Supply Chain Management

Training Course code: PU8169 From: 14 - 18 July 2025 Venue: Kuala Lumpur (Malaysia) - Royale Chulan Kuala Lumpur
Training Course Fees: 5500 € Euro

Introduction

The development and implementation of carefully crafted strategies for the acquisition of all materials, goods, equipment, and services have become a critical issue in all organizations wishing to reduce operating costs while improving quality and productivity. This program explores key concepts forming the basis of procurement and supply chain management and moves through leading-edge issues that confront organizations today.

This fast-paced program is designed for those wanting to develop high-performance purchasing and supply chain organizations as we will in this course:

- Achieve a thorough understanding of what is the best practice.
- Establish the mission, vision, and knowledge needed to successfully implement the processes and methods needed to reach world-class performance.
- Provide an overview of the key drivers involved when viewing supply chains from a logistics/demand point of view.
- Explain what procurement and supply chain management is fundamentally about so that delegates are able to apply key techniques in controlling cost, time, and the movement of goods and materials to customers and users.
- Provide practical skills to take back to the workplace to enable delegates to change current methods and activities and work better with all supply chain players.

Objectives:

- Review the meaning of strategic procurement.
- Be given examples of best practices in procurement and the supply chain.
- Review how to obtain the best pricing.
- Be taught how to develop spend analysis.
- Develop a functional and cross-functional view of the supply chain.
- See that better working with all of the supply chain players pays.
- Consider Key Performance Indicators KPIs.

Organizational Impact

- Higher productivity of personnel involved in procurement activities.
- Better outcomes in transactions with contractors and suppliers.
- Reduced total cost of materials & services.
- Better integration between internal functions.
- Improved contractor/supplier performance.
- Succeed in improving operations.

Personal Impact

- Increased skill sets.
- A greater ability to lead, plan, and manage the procurement and supply chain process.
- A greater sense of professionalism and ability to contribute to the organization.
- Increased recognition from the organization due to improved personal performance.
- Ability to understand, recall, and apply improvements after the seminar for work-based application.
- Applying best-in-class practices.
