## Training Course: Process Plant Optimisation & Energy Conservation

Training Course code: EN6043 From: 2 - 6 November 2025 Venue: Istanbul (Turkey) - DoubleTree by Hilton Istanbul Esentepe Training Course Fees: 6500 € Euro

### Introduction

Plant integrity and reliability is the cornerstone of process plant optimization. For optimization benefits to be sustainable, production interruptions must be kept to a minimum which requires effective management of degradation processes that affect equipment and systems and effective inspection and maintenance strategies, plans and methods. Plant optimization can be an effective way to achieve improved profitability without the large investment associated with building a new plant.

Common industrial processes and systems, such as steam, cooling water, process heating, and electric motors consume most of the energy and offer significant opportunities for savings. Process changes such as advanced controls, new catalysts, and new technologies also present opportunities for plant optimization. This course will provide a comprehensive review of the various aspects of process plant integrity as an essential foundation for sustainable plant profitability and optimization.

Principal emphasis is placed on:

- understanding the elements of plant optimization
- systematic and coordinated efforts by engineering, operations, and maintenance functions
- maximization of plant availability, reliability, and productivity
- minimizing operational costs
- safeguarding of plant integrity over its intended life based on total life cycle cost principles

### Objectives

- To assist participants in clearly understanding what plant optimization and energy conservation is all about - the drivers, the potential benefits, and how to realize them
- To enhance the business focus of participants and equip them to make more contributions to sustainable plant profitability
- Learn how to identify the most attractive opportunities for energy savings
- Provide the delegate with managerial tools to effectively optimize plant operations
- To provide participants with practical and effective methods and tools to perform technical and economic evaluations of the alternatives

## Benefits

### Delegates will:

- Gain a sound understanding of the main elements of plant integrity and reliability and why this is the cornerstone of sustainable plant optimization and energy efficiency.
- Improve their understanding of the business aspects of the process plant which will help them focus on improving the economic performance.
- Learn how to perform key project analyses including technical, economic, and environmental evaluations.
- Enhance their competence and productivity thereby enhancing their competence and performance level and making additional value-added contributions to their organization.
- Develop the technical and analytical skills necessary for conducting technical evaluations.
- Have the skills necessary to participate in plant energy audits.
- Be able to apply risk-based methodologies in inspection and maintenance.

## Results

- Through effective management of energy use, the plant can minimize the overall cost of energy.
- By diligent use of process optimization techniques, the company can improve production rates while maintaining the best safety practices.
- Management can lessen the risk associated with production operations while realizing direct measurable bottom-line savings.
- The company will be able to enhance its plant reliability and integrity by using improved maintenance strategies and methods based on risk-based inspection and maintenance.
- Lower life cycle costs can be achieved while complying with codes and standards, and other regulatory requirements.
- The company will have personnel who will have the economic and analytical skills necessary for performing credible economic evaluations.

## Competencies

Planning and predictive maintenance of plant is vital to the budgetary success of the operations organisation. On completion of this seminar, the delegate will be able to critically analyze the methodologies employed within the organization and instigate improvements where required.

Technical knowledge is key to effective control and peer respect within any maintenance organisation; when this is achieved personal satisfaction follows. This seminar will give the delegate the required level of technical knowledge and skill to achieve personal satisfaction.

## Outlines

### Day 1:

#### Process Plant Operation, Integrity and Reliability

- Process Plant Optimization and Energy Conservation - Overview
- Asset Integrity Management AIM and Optimization - Integrating operation, inspection, maintenance effort
- Plant Integrity and Reliability - Cornerstone of Plant Optimization and Energy Management
- Operation and Maintenance Impacts on Plant Integrity and Reliability
- Equipment condition monitoring and assessment
- Establishment of Operating Windows OW - Maximize throughput within the limits defined by mechanical-structural integrity over the expected life of the asset components
- Effective management of change MOC program - On-going link between engineering, operations, and maintenance
- Process Plant Economics

### Day 2:

#### Process Plant Optimization

- Process Control Basics
- Elements of Process Plant Optimization
- Components Required To Optimize An Industrial Process
- Process or a mathematical model of the process, and process variables which can be manipulated and controlled
- Application Of Simulation Technology To Plant Optimization And Control - Plant Optimization Models
- The Basics Of Heat Integration
- Pinch technology
- Heat exchanger train optimization
- Optimization procedure
- Application Of Simulation Technology To Plant Optimization And Control - Plant Optimization Models

### Day 3:

## Industrial Energy Management - Energy Efficiency: Good for Business - Good for the Environment

- Energy Use and Optimization in Process industries
- Industrial Energy Management Techniques
- Industrial Energy Management and System Standards
- Industry Program for Energy Conservation
- Best Practices in Process Plant Energy Management
- Developing Customized Energy Management Program
- An obstacle that Face Energy Management Programs
- Workshop - Examples of energy management programs and standards - CIPEC, UNIDO. Incentives for an energy assessment and energy retrofit projects

### Day 4:

#### Energy Conservation Opportunities

- Implementing an Energy Management Program
- Benchmarking Energy Intensity and Usage
- Technology Options - New energy-efficient technologies. Examples include Corrosion analyzer for advanced materials and fabricated components Fiber optic sensor for combustion measurement and control
- Energy Conservation Checklist
- Plant processes
- Mechanical Systems
- Electric Power
- Technical and Economic Evaluation of Potential Opportunities

### Day 5:

#### The Implications of Plant Optimization Activities

- Relating Energy Efficiency To Business Outcomes
- Impact of optimization activities and technological modifications to the plant
- Plant integrity and safety

- Technology licenses
- Financing agreements
- Impact on Human Resources - The human factor

## Registration form on the Training Course: Process Plant Optimisation & Energy Conservation

Training Course code: EN6043 From: 2 - 6 November 2025 Venue: Istanbul (Turkey) - DoubleTree by Hilton  
Istanbul Esentepe Training Course Fees: 6500 € Euro

Complete & Mail or fax to Global Horizon Training Center (GHTC) at the address given below

### Delegate Information

Full Name (Mr / Ms / Dr / Eng): .....  
Position: .....  
Telephone / Mobile: .....  
Personal E-Mail: .....  
Official E-Mail: .....

### Company Information

Company Name: .....  
Address: .....  
City / Country: .....

### Person Responsible for Training and Development

Full Name (Mr / Ms / Dr / Eng): .....  
Position: .....  
Telephone / Mobile: .....  
Personal E-Mail: .....  
Official E-Mail: .....

### Payment Method

- ☐ Please find enclosed a cheque made payable to Global Horizon
- ☐ Please invoice me
- ☐ Please invoice my company

### Easy Ways To Register

Telephone:  
+201095004484 to  
provisionally reserve your  
place.

Fax your completed  
registration  
form to: +20233379764

E-mail to us :  
info@gh4t.com  
or training@gh4t.com

Complete & return the  
booking form with cheque  
to: Global Horizon  
3 Oudai street, Aldouki,  
Giza, Giza Governorate,  
Egypt.
