Training Course: Foundations of Business Improvement

Training Course code: MA235646 From: 27 - 31 October 2025 Venue: London (UK) - Landmark Office Space - Portman Street Training Course Fees: 5500 € Euro

Introduction

In the modern business landscape, organizations need to be agile, efficient, and innovative to stay competitive. Business improvement is no longer an option but a necessity, as companies must continually optimize their processes and align with best practices to thrive. [Foundations of Business Improvement](#) is a structured training program aimed at professionals who are looking to build on their foundational knowledge, focusing on effective techniques to identify and implement meaningful improvements within their teams and workflows.

This program introduces participants to a range of practical tools and strategies that can help drive incremental and sustainable improvements across various business processes. Through interactive sessions, participants will learn how to analyze processes, develop clear goals, and implement changes that align with organizational objectives. The program emphasizes real-world application, offering case studies, group discussions, and hands-on exercises to enable participants to build their skillset in business improvement.

By the end of the program, participants will have gained a deeper understanding of process efficiency, performance measurement, and change management. They will be equipped to bring fresh insights into their roles, fostering a culture of continuous improvement within their organizations.

Objectives

- Understand core principles and strategies in business improvement.
- Learn to evaluate processes and identify key areas for improvement.
- Acquire skills in process mapping, data analysis, and KPI tracking.
- Develop the ability to create actionable improvement plans aligned with business goals.
- Build strategies to manage change effectively and sustain improvements over time.

Target Audience

This program is designed for professionals across various departments, including:

- Middle managers and team leads seeking to improve their team's efficiency.
- Process analysts and coordinators responsible for optimizing workflows.
- Project managers focused on enhancing project outcomes.
- Professionals in operations, customer service, and production roles aiming to implement improvement strategies.
