Training Course: Digital Governance and Data Analysis

Training Course code: SC235061 From: 30 November - 4 December 2025 Venue: Cairo (Egypt) - Holiday Inn & Suites Cairo Maadi, an IHG Hotel Training Course Fees: 3875 € Euro

Introduction

Digital Governance Certification Because of its growing importance, corporate governance, and risk management is starting to attract the interest of business schools and legislative bodies. There are many different models for corporate governance and risk management; However, all of them aim to regulate the relationship between the company and its stakeholders and to manage risks effectively. Most importantly, [governance, risk management, compliance, and effective internal controls] are all part of one system, but unfortunately, not all institutions view them in a unified, integrated perspective. This course includes discussions on the structure of the Board of Directors, committees, their functions, and policies issued by the Board of Directors, with coverage of the risk management process in accordance with COSO guidelines and ISO standards. In addition, the course includes a unit on compliance in accordance with ISO standards that covers the latest developments in this field.

Course objectives

By the end of this digital governance course, you will be able to:

- Learn the concepts of digital transformation and governance
- Recognize the importance of emerging governance requirements for digital transformation
- Identify the importance of the mechanisms used in the governance of information technology
- Knowing how to change and correct data in case of any formatting problems
- Explore the data, find patterns in it, and build a hunch around it
