

*Training Course:
Cleaning Network and Line Equipment (400/220)*

*6 - 17 July 2025
Sharm El-Sheikh (Egypt)
Sheraton Sharm Hotel*

Training Course: Cleaning Network and Line Equipment (400/220)

Training Course code: EN235690 From: 6 - 17 July 2025 Venue: Sharm El-Sheikh (Egypt) - Sheraton Sharm Hotel Training Course Fees: 7450 € Euro

Introduction

This program is designed to provide specialized knowledge and hands-on skills for safely cleaning and maintaining network and line equipment operating at 400/220 kV. Participants will learn essential practices for ensuring system reliability, minimizing outages, and maintaining high standards of occupational safety and electrical security.

Objectives

- Understand the operational principles of 400/220 kV network and line equipment.
- Identify safe cleaning methods and materials for high-voltage systems.
- Implement best practices to maintain equipment efficiency and prevent contamination.
- Learn the importance of coordination and planning in cleaning operations.
- Adhere to safety protocols and regulatory standards.

Target Audience

- Electrical maintenance engineers and technicians.
- Substation and transmission line operators.
- Safety officers in electrical utilities.
- Professionals responsible for high-voltage equipment maintenance.

Outlines

Day 1: Overview of High-Voltage Network Equipment

- Introduction to 400/220 kV network and line equipment.
- Function and significance of transformers, insulators, and circuit breakers.
- Effects of contamination and pollution on equipment performance.

Day 2: Contamination Types and Effects

- Understanding various contaminants dust, oil, salt, etc..
- Impact of contamination on high-voltage equipment.
- Methods to assess contamination levels.

Day 3: Cleaning Principles and Techniques

- Fundamentals of cleaning high-voltage equipment.
- Wet and dry cleaning methods.
- Selecting appropriate cleaning agents for different materials.

Day 4: Safety Measures in Cleaning Operations

- Electrical safety procedures for high-voltage systems.
- Lockout/tagout LOTO processes.
- Use of Personal Protective Equipment PPE in cleaning operations.

Day 5: Tools and Equipment for Cleaning

- Overview of cleaning tools e.g., brushes, air blowers, water jet systems.
- Inspection and maintenance of cleaning tools.
- Demonstration of tool usage for cleaning line and network equipment.

Day 6: Cleaning Substation Equipment

- Techniques for cleaning insulators, bushings, and transformers.
- Removing oil spills and other contaminants.
- Best practices for substation cleaning.

Day 7: Cleaning Overhead Lines and Towers

- Safe access and cleaning of transmission towers.
- Cleaning methods for conductors and insulators.
- Challenges and solutions in different environments e.g., urban, coastal.

Day 8: High-Voltage Cleaning Standards and Regulations

- Industry standards for cleaning operations.
- Regulatory compliance in cleaning 400/220 kV equipment.
- Case studies on non-compliance consequences.

Day 9: Planning and Coordination of Cleaning Activities

- Scheduling cleaning operations to minimize system downtime.
- Coordination with operations and safety teams.
- Documentation and reporting of cleaning activities.

Day 10: Inspection and Quality Assurance

- Post-cleaning inspection procedures.
- Ensuring cleaning quality and equipment reliability.
- Continuous improvement in cleaning practices.

Registration form on the Training Course: Cleaning Network and Line Equipment (400/220)

Training Course code: EN235690 From: 6 - 17 July 2025 Venue: Sharm El-Sheikh (Egypt) - Sheraton Sharm Hotel Training Course Fees: 7450 € Euro
