Conference: Advanced Process Risk Assessment & Risk Management

Conference code: CO8231 From: 27 - 31 July 2025 Venue: Amman (Jordan) - Chemistry Conference Fees: 3875 € Euro

Introduction

Health, Safety & Environmental Management: Proactive Risk Prevention

This seminar focuses on proactive and reactive approaches to managing health, safety, and environmental risks. Participants will develop advanced skills in risk assessment, balancing risk and cost, and fostering a strong safety culture. Key topics include Quantified Risk Assessment, major hazard management, and root-cause analysis for incident investigation. Equip yourself with the tools to optimize safety and protect assets, the environment, and company reputation.

Objectives

- Recognize the difference between hazard, risk and risk assessment
- Learn how to evaluate different types of risk
- Develop the skills of applying advanced risk assessment techniques relevant to the process industry
- Develop a strategy for planning and implementing risk reduction action plans
- Appreciate the contribution of human error to accidents
- Be able to apply advanced techniques for root-cause analysis for incidents

Methodology

Participants will learn by active participation during the program through the use of exercises, syndicate and group discussion, training videos, and discussions on relevant types of accidents and "real life" issues in their organizations.

Summary

The conference aims to provide hands-on experience in the application of advanced risk assessment techniques to all aspects of the process industry. It includes analysis of the consequences of major hazards, in terms of fire, explosion, and toxic releases. These are modeled using advanced commercial software. Aspects of human error in relation to accidents are analyzed and included in methods for promoting a positive safety culture in your organization.

This training session also explores the role of analytical investigation and root-cause analysis based on Fault Tree Analysis.

Participants will be able to apply skills learned from this training at a practical level to implement the Company's

HSE Management System. In addition to your professional development, your organization should be able to implement, monitor, and review HSE action plans.

Outlines

Day 1: Advanced Risk Assessment Techniques 1: HAZOP

- Introduction to hazards identification and analysis techniques
- Techniques for hazard identification and analysis- HAZOP
- Syndicate exercise- application of HAZOP to batch and continuous processes
- Integrating HAZOP within the risk management system
- Review of commercial HAZOP software

Day 2: The role of Quantified Risk Assessment [QRA]

- Failure Modes & Effects Analysis [FMEA]
- Decision trees and Event Tree Analysis [ETA]
- Sources of failure data
- Fault Tree Analysis [FTA]
- Quantification of ETA and FTA
- Evaluation of Individual and Societal Risks

Day 3: Mechanics of Fire, Explosion, and Toxic Releases

- The role of consequence analysis in QRA
- Types of Fires: Jet flame, pool fire, flash fire, BLEVE
- Types of Explosion: VCE, UVCE, pressure burst, dust explosion
- Vulnerability analysis
- Commercial software for modeling releases, fire, explosion and toxic releases

Day 4: Advanced Incidents Investigation Techniques

- The human contribution to accidents
- The role of root cause Analysis in identifying management system failures

- Accident investigation techniques
- Latent failure and root causes for incidents
- Techniques for root-cause analysis

Day 5: Promoting a positive safety culture

- Introduction to Safety Culture
- Techniques for improving safety culture
- Measuring improvements in safety culture
- Integrating safety culture within the HSE Management System

Registration form on the Conference: Advanced Process Risk Assessment & Risk Management

Conference code: CO8231 From: 27 - 31 July 2025 Venue: Amman (Jordan) - Chemisty Conference Fees: 3875 € Euro
