Conference: Supply Chain Risk Management

Conference code: CO8107 From: 8 - 12 June 2025 Venue: Amman (Jordan) - Chemistry Conference Fees: 3875 € Euro

Introduction

Effective supply chain professionals need to be able to ensure their organizations become industry pacesetters, by better managing their supply chains to achieve reduced costs, whilst at the same time, improving service levels.

However, global trade has brought about proportionally high levels of risk and uncertainty. In turn, this uncertainty creates a risk spiral that is accompanied by increased cost and reduced levels of service. Risk is found in all supply chains, but with analysis, preparation, and action, these risks can be avoided, managed, or deflected.

Smart organizations must, therefore, find ways to manage risk, uncertainty, and variability and at the same time, look to reduce cost and improve service.

This seminar shows how to apply useful tools and techniques to successfully manage this dilemma and paradox.

Conference Objectives of Supply Chain Risk Management

- Apply a thorough understanding of supply chain activities
- Identify, analyze and evaluate supply chain risk
- Understand the keys aspects of reducing risk
- Use risk management tools and techniques
- Make supply chain organizational improvements

Conference Process of Supply Chain Risk Management

- Discussion and lectures using international best practice
- Practical applications
- Exercises and Case studies
- Extensive course manual
- Presented by the author of many books on supply chain and procurement topics

Conference Benefits of Supply Chain Risk Management

- Understanding the supply chain operations
- Understand what drives your other supply chain players
- Use analytical tools to identify supply chain risk
- Make cost and service improvements
- Gain a framework for continual improvement
- Use best in class practices

Conference Results of Supply Chain Risk Management

- Understand the current supply chains
- Access them for risk and vulnerability

- Examine how to mitigate risks
- Apply appropriate tools
- Make continual improvements

Core Competencies of Supply Chain Risk Management

- Analysis
- Evaluation
- Improving
- Make change
- Sharing and understanding other points of view

Conference Outlines of Supply Chain Risk Management

Day 1: Understanding the Supply Chain

- Supply Chain Definitions
- The 8 Supply Chain Rules
- Customers, competitive advantage and demand
- Supply Chain Models and Types
- The Global Supply Chain
- Incoterms 3000 and reducing Risk
- Recognizing Risks in the Supply Chain

Day 2: Identifying Supply Chain Instabilities and Risks

- Internal supply chain risks
- PESTLE risks
- Inventory risks
- Financial risks
- Disruption risks
- Security risks
- Mismanaged relationship risks
- Procurement risks
- Logistics risks
- Learning from the 2008 economic crisis

Understanding the Risk Spiral

- Consequences
- Outcomes
- Analyzing the key drivers of risk

Day 3: Reducing Supply Chain Risk

- Improving visibility
- Reducing variability
- Maintaining velocity
- Restoring confidence
- Enabling agility and synchronicity in supply chain
- Applying Supplier Relationship Management

Day 4: Using Risk Management Tools and Techniques

- Risk mitigation options
- Risk mitigation matrix
- Risk management principles
- RAG assessment
- The role of Procurement and Supply Chain strategy
- Evaluation and prioritization of risks
- The risk management matrix
- Developing a risk management culture
- Contingency and risk management planning
- Supply chain resilience

Day 5: Rethinking the Supply Chain

- Supply chain futures and predictions
 - Agility
 - Network design
 - China supply chain effects
 - Going "Green"
 - Professional leaders/manager development
- Reengineering supply chains end to end to minimise risk
- Organisation development
- Models for change
