

*Training Course:  
Oil Spill & Responses*

*20 - 24 October 2025  
Trabzon (Turkey)*

## Training Course: Oil Spill & Responses

Training Course code: SC235351 From: 20 - 24 October 2025 Venue: Trabzon (Turkey) - Training Course Fees: 6000 € Euro

### Introduction

Oil spills pose significant environmental, economic, and social challenges worldwide. Effective response and management are essential to minimize the impact of spills on ecosystems, human health, and livelihoods. This comprehensive training program aims to equip participants with the knowledge, skills, and tools necessary to respond to oil spills efficiently and effectively. Covering various aspects of oil spill preparedness, response techniques, regulatory frameworks, and post-incident procedures, this program offers a holistic approach to addressing the complexities of oil spill management.

### Objectives

- Understand the fundamentals of oil spill causes, behavior, and impacts.
- Familiarize participants with health and safety protocols essential for oil spill response operations.
- Explore techniques for spill assessment, contingency planning, and environmental risk assessment.
- Equip participants with practical skills in oil recovery, shoreline cleanup, and wildlife rescue.
- Provide insights into regulatory frameworks, international conventions, and legal aspects of oil spill response.
- Enhance participants' abilities to communicate effectively with the media and stakeholders during an oil spill incident.
- Foster a proactive approach to post-incident assessment, record-keeping, and continuity planning.

### Target Audience

This training program is designed for a diverse range of professionals and stakeholders involved in or responsible for oil spill preparedness, response, and management. The target audience includes:

- Emergency responders and personnel involved in spill response operations, including:
  1. Coast Guard personnel
  2. Oil spill response teams
  3. Environmental protection agencies
  4. Firefighters and hazmat teams

- Environmental professionals and researchers engaged in oil spill assessment, monitoring, and remediation.
- Government officials and policymakers responsible for developing and implementing oil spill contingency plans and regulatory frameworks.
- Industry professionals working in the oil and gas sector, including:
  1. Oil rig operators
  2. Shipping and tanker companies
  3. Oil refineries and petrochemical plants
- Legal experts, insurance professionals, and risk managers involved in liability, compensation, and insurance aspects of oil spill incidents.
- Media relations professionals responsible for managing communication and public relations during oil spill incidents.
- Non-governmental organizations NGOs and community groups advocating for environmental protection and wildlife conservation.

## Outline

### Day 1: Introduction and Basic Concepts

- Introduction and Background
  - Overview of oil spills: causes, impacts, and consequences
  - Historical examples of significant oil spills and their lessons
  - Introduction to regulatory frameworks and international conventions
- Health and Safety Management
  - Importance of health and safety in oil spill response
  - Personal protective equipment PPE and its proper usage
  - Emergency response protocols and evacuation procedures

### Day 2: Spill Assessment and Contingency Planning

- Fate and Effects & Spill Assessment
  - Understanding the behavior of oil in different environments
  - Techniques for spill assessment and monitoring

- Assessing potential environmental and ecological impacts
- Contingency Planning & Containment and Protection
  - Development of oil spill contingency plans
  - Strategies for containment and protection of sensitive areas
  - Deploying booms, barriers, and other containment methods

### Day 3: Response Techniques and Operations

- Recovery Devices & Shoreline Response
  - Types of oil recovery devices and their applications
  - Techniques for shoreline cleanup and restoration
  - Challenges and considerations in shoreline response
- Dispersants & Operations Planning
  - Understanding dispersants and their role in oil spill response
  - Planning and implementing dispersant operations
  - Environmental considerations and regulations for dispersant use

### Day 4: Wildlife and Waste Management

- Oiled Wildlife Response & Waste Management
  - Protocols for wildlife rescue, rehabilitation, and release
  - Handling and treating oiled wildlife safely and effectively
  - Proper management and disposal of oily waste materials
- IMO and NCP
  - Overview of International Maritime Organization IMO regulations
  - Understanding the National Contingency Plan NCP and its implementation
  - Coordination and cooperation among stakeholders and agencies

### Day 5: Legal and Media Aspects, Post-Incident Response

- Record and Log Keeping & Liability and Compensation

- Importance of accurate record-keeping during response operations
- Legal liabilities and responsibilities of stakeholders
- Compensation mechanisms for affected parties
- Media
  - Handling media relations during an oil spill incident
  - Communicating effectively with the public and stakeholders
  - Strategies for managing public perception and reputation
- Deactivation and Post-Incident Response
  - Procedures for deactivating response operations
  - Post-incident assessment and lessons learned
  - Continuity planning for future incidents
