## Training Course: Business Continuity Auditing Plans Using ISO 22301

Training Course code: MA235835 From: 28 September - 2 October 2025 Venue: Dubai (UAE) - Residence Inn by Marriott Sheikh Zayed Road, Dubai Training Course Fees: 4500 € Euro

### Introduction:

The Business Continuity Auditing Plans Using ISO 22301 training program has been carefully developed and is delivered by Global Horizon Training Center, a leading provider of professional training in business continuity, risk management, and compliance. Global Horizon Training Center is committed to delivering high-quality, practical training solutions that empower professionals to safeguard business operations in the face of disruptions, crises, or disasters.

ISO 22301, the international standard for business continuity management, provides a framework for organizations to establish, implement, operate, monitor, review, maintain, and improve their business continuity management systems BCMS. This training program is designed to provide professionals with the knowledge and skills necessary to audit and evaluate business continuity plans BCPs and systems using the ISO 22301 framework. Participants will learn how to ensure that their organizations are resilient to disruptions and can continue operations with minimal impact during times of crisis.

### Objectives:

By the end of this training program, participants will be able to:

1. Understand the key concepts of business continuity management and the ISO 22301 standard.
2. Conduct audits of business continuity plans and strategies to ensure compliance with ISO 22301.
3. Identify gaps in business continuity management and propose corrective actions.
4. Evaluate the effectiveness of business continuity systems and processes within an organization.
5. Understand the role of risk assessment, business impact analysis BIA, and recovery strategies in the ISO 22301 framework.
6. Develop audit reports with actionable recommendations to improve business continuity practices.
7. Implement best practices for maintaining and improving business continuity plans.
8. Understand the relationship between business continuity, organizational resilience, and crisis management.
9. Prepare organizations for ISO 22301 certification audits or internal audits of BCMS.

### Course Methodology:

This course will utilize a variety of methodologies to ensure a dynamic and interactive learning experience for participants:

1. Instructor-Led Sessions - Structured lectures on the principles, practices, and standards of business continuity management and ISO 22301.
2. Case Studies - Real-world case studies will be reviewed to illustrate both successful and unsuccessful business continuity audits.

3. Practical Exercises - Hands-on exercises will allow participants to apply auditing principles and assess a company's business continuity plans.
4. Group Discussions - Group discussions to encourage collaborative learning and exchange of ideas on auditing and improving business continuity practices.
5. Simulations and Role-Playing - Simulated business continuity audit scenarios will provide participants with practical auditing experience.
6. Assessments & Quizzes - Regular quizzes and assessments to gauge understanding and reinforce learning outcomes.
7. Audit Checklist and Tools - Participants will be provided with tools such as audit checklists to assist in evaluating business continuity plans and systems.

## Organizational Impact:

The skills and knowledge gained through this training program will provide significant benefits to your organization:

1. Enhanced Business Resilience - By understanding how to audit and strengthen business continuity plans, your organization will be better prepared for crises and disruptions.
2. Compliance with ISO Standards - Participants will learn how to ensure business continuity plans meet ISO 22301 standards, demonstrating compliance with international best practices.
3. Improved Risk Management - The ability to identify vulnerabilities and gaps in business continuity processes will improve your organization's overall risk management framework.
4. Effective Crisis Management - Auditing business continuity plans ensures that organizations can effectively manage crises and minimize downtime during disruptions.
5. Faster Recovery - With robust business continuity management systems, your organization can reduce recovery time and costs in the event of a crisis.
6. Increased Stakeholder Confidence - Effective audits and improved business continuity plans will enhance the confidence of customers, investors, and regulators in your organization's resilience and risk management capabilities.
7. Cost Savings - Well-prepared business continuity plans can reduce the financial impact of disruptions by ensuring rapid response and recovery.

## Target Audience:

This training program is designed for professionals responsible for business continuity, crisis management, and auditing within their organizations. The target audience includes:

1. Business Continuity Managers and Coordinators
2. Risk Management Professionals
3. Auditors Internal and External
4. Compliance Officers
5. Emergency Management Professionals
6. Operations Managers and Business Leaders
7. IT and Security Professionals involved in business continuity planning
8. Consultants and Advisors in business continuity or risk management
9. Anyone responsible for the planning, auditing, and implementation of business continuity strategies
10. Professionals seeking ISO 22301 certification for their organizations
