

*Training Course:
Occupational Safety and Health Systems
Management*

20 - 24 October 2025

London (UK)

Landmark Office Space - Portman Street

Training Course: Occupational Safety and Health Systems Management

Training Course code: HE235941 From: 20 - 24 October 2025 Venue: London (UK) - Landmark Office Space - Portman Street Training Course Fees: 6000 € Euro

Introduction

Occupational safety and health systems include a set of standards and practices aimed at protecting production elements—especially the human element—from accidents and injuries in the workplace. These systems work to create suitable conditions and techniques to ensure worker safety, thereby enabling high productivity. Business organizations pay close attention to occupational safety and health systems, integrating them into human resource management strategies. The rationale is that a physically and mentally healthy worker is the ideal employee for institutions that seek continuous and uninterrupted productivity. Ensuring the safety of the workforce is therefore a top priority in any discussion concerning work or production.

Objectives

By the end of this training program, participants will be able to:

- Understand the latest occupational safety and health programs, OSHA standards, and the required procedures and guidelines for various activities in their facilities.
- Conduct inspections and assessments related to safety procedures and develop appropriate emergency response plans.
- Apply safety and health policies, standards, and procedures in accordance with the Occupational Safety and Health Administration OSHA - U.S. Department of Labor management levels.

Target Audience

- Managers, engineers, and supervisors in occupational safety and health.
- Safety inspectors and officers at various work sites.
- Supervisors with responsibilities related to occupational safety and health.
- Managers, engineers, and supervisors in construction and development projects.
- Operations and maintenance supervisors, shift leaders, and workgroup leaders.
- Engineers and supervisors at construction sites.
- Engineers and technicians all specialties.

- Anyone wishing to enhance their skills and knowledge in this field.

Training Program Outline
