## Training Course: Agile Software Development

Training Course code: SC235986 From: 3 - 7 November 2025 Venue: Kuala Lumpur (Malaysia) - Royale Chulan Kuala Lumpur Training Course Fees: 6000 € Euro

### Introduction:

This Agile Software Development training program is designed by Global Horizon Training Center to equip software professionals, project managers, team leaders, and developers with the tools, techniques, and mindset necessary to implement and manage Agile frameworks effectively. As organizations shift toward iterative development and continuous delivery, Agile methodologies like Scrum, Kanban, and SAFe have become essential for successful project execution and customer satisfaction.

### Training Objectives:

By the end of this training, participants will be able to:

- Understand Agile principles and values based on the Agile Manifesto.
- Differentiate between various Agile methodologies and frameworks Scrum, Kanban, XP, SAFe.
- Implement Agile planning, estimation, and delivery practices.
- Define user stories, manage backlogs, and conduct effective sprint planning.
- Facilitate Agile ceremonies such as stand-ups, retrospectives, and demos.
- Lead Agile teams and manage roles like Scrum Master and Product Owner effectively.
- Use Agile metrics and tools to track progress and enhance team performance.
- Integrate Agile with DevOps and Continuous Integration/Delivery practices.

### Course Methodology:

- Interactive lectures and expert-led discussions
- Case studies and real-world Agile implementation scenarios
- Group activities, role-playing, and simulation of Agile ceremonies
- Practical workshops using Agile tools e.g., Jira, Trello
- Daily review sessions and quizzes to reinforce learning
- Hands-on exercises in creating user stories, sprint planning, and retrospectives

## Organizational Impact:

Organizations that invest in this training will benefit by:

- Accelerating product delivery cycles with higher adaptability to change.
- Improving cross-functional team collaboration and ownership.
- Enhancing visibility and predictability in project execution.
- Reducing project risks through iterative development and continuous feedback.
- Building a culture of continuous improvement, innovation, and customer satisfaction.
- Increasing ROI on software development efforts through effective Agile practices.

## Target Audience:

This course is ideal for:

- Software developers and engineers
- Project and program managers
- Scrum Masters and Product Owners
- Agile coaches and team leads
- QA professionals and business analysts
- IT managers and product managers
- Anyone involved in software development or delivery projects

## Outlines:

### Day 1: Agile Foundations and Principles

- Introduction to Agile and the Agile Manifesto
- Core values and principles of Agile
