Training Course: Security Strategic Planning, Policy, and Leadership

Training Course code: SC236083 From: 4 - 8 August 2025 Venue: Amsterdam (Netherlands) - Training Course Fees: 6000
€ Euro

Introduction:

In today's complex threat environment, cybersecurity is no longer just an IT concern—it is a strategic imperative. Organizations must establish robust security strategies that align with business objectives, comply with regulatory requirements, and are supported by effective leadership and clear policy frameworks. This intensive 5-day training program equips security leaders and decision-makers with the strategic planning, policy development, and leadership skills required to design and implement enterprise-wide security strategies.

Through case studies, group exercises, and expert insights, participants will gain the knowledge to assess organizational risks, craft policies that reflect industry best practices, and lead security initiatives with confidence. Whether managing a cybersecurity function, developing governance structures, or leading cross-functional security programs, this course enables professionals to create resilient, policy-driven security ecosystems.

Target Audience:

- Chief Information Security Officers CISOs
- Security Program Managers and Governance Leads
- Risk and Compliance Officers
- Heads of IT or Cybersecurity
- Public and Private Sector Security Decision-Makers

Objectives:

By the end of this program, participants will be able to:

- Build a strategic security vision aligned with business goals
- Develop and implement effective security policies and governance models
- Lead organization-wide security programs with measurable impact
- Understand regulatory and compliance obligations across industries
- Manage resources, stakeholder expectations, and incident response at a strategic level
- Foster a culture of security leadership and accountability

Methodology:

- Expert-led lectures with global case examples
- Interactive discussions and leadership workshops
- Risk and strategy simulation exercises
- Group activities for policy drafting and review
- Templates, frameworks, and real-world planning tools

Outlines:

Day 1:

Foundations of Security Strategy and Governance

- The evolving role of cybersecurity in enterprise strategy
- Components of a strong security governance framework
- Building a risk-based security strategy
