

*Training Course:
Advanced Monitoring and Evaluation*

19 - 23 October 2025

Cairo (Egypt)

Holiday Inn & Suites Cairo Maadi, an IHG Hotel

Training Course: Advanced Monitoring and Evaluation

Training Course code: MA234775 From: 19 - 23 October 2025 Venue: Cairo (Egypt) - Holiday Inn & Suites Cairo Maadi, an IHG Hotel Training Course Fees: 3550 € Euro

Introduction

Monitoring and Evaluation are increasingly identified as the cornerstone for efficacious program management and are essential for organizational sustainability. A continuously increasing need for suitably skilled monitoring and evaluation project managers has been identified as a priority area by various stakeholders active in different sectors and industries, as an example; globally-funded sponsorships often require evidence of effective monitoring and evaluation systems before awarding funds.

The Advanced Monitoring and Evaluation training course aims to provide managers and M&E officers across different sectors with advanced skills and knowledge to successfully design and implement monitoring and evaluation systems from program/project initiation to close-out.

This program is structured in such a way that it guides learners to apply monitoring and evaluation principles within the context of their unique work environment.

Objectives

After completion of this qualification, participants will be able to:

- Master key principles of monitoring and evaluation relevant to implementing projects and programs
- Apply results-based management principles
- Explain and apply the value of a Theory of Change and Logical Framework in monitoring and evaluation
- Learn how to undertake a stakeholder mapping and analysis for monitoring and evaluation purposes
- Design monitoring frameworks
- Manage data quality
- Conduct routine data quality assessments
- Identify indicators for projects and programs
- Demonstrate the ability to use and report on monitoring data
- Plan and conduct an evaluation
- Study practical considerations in selecting appropriate evaluation designs and methods for data collection
- Construct an organizational learning agenda and identify evaluation priorities and questions
- Apply evaluation ethics
- Acquire skills in developing practical sampling and data analysis strategies

- Plan for resources needed for an evaluation
- Develop a Terms of Reference for evaluations
- Learn key steps in ensuring effective communication and utilization of evaluation findings

Target Audience

Any individual that is presently operating in a monitoring and evaluation role who has identified a need to further develop their monitoring and evaluation knowledge and skills, in addition to their current vocational focus, e.g. a manager whose performance agreement demands the effective design and management of monitoring and evaluation system for a program or organization.

Outlines

Day 1

- Introduction to monitoring and evaluation principles and concepts
- Programme Logic Models and Theory of Change
- Analysing and reporting monitoring data for decision making
- M&E in the context of the 2030 National Plan
- Results-Based Management - history, meaning, context.

Day 2

- Problem analysis tools and techniques
- The theory of change
- Developing a results chain
- Linking and testing the relationship between the theory of change and the results chain
- Linking the log frame and budget
- The meaning and types of result
- Defining results and indicators

Day 3

- Structure and types of indicators

- Design an M&E framework
- Monitoring the M&E framework
- Communicating the M&E framework
- Understanding the roles of key practitioners in the maintenance of the framework
- Facilitate team performance improvements using assessment findings;
- Establish performance standards and monitoring systems - linking individual and organizational processes

Day 4

- Understand methods and tools for basic data collection;
- Understand methods and tools for basic data analysis;
- Understand the key uses of monitoring data: project management, evaluation, and reporting;
- Understand the difference between process and outcome evaluation practices; and
- Develop project evaluation reports.
- The outcomes-based approach and strategic planning
- Problem analysis -understanding the context, assumptions, and challenges

Day 5

- Designing evaluations
- Planning and managing evaluations
- Disseminating and using evaluation results
- Designing monitoring systems for programs
- Implementing program monitoring systems
- Managing data quality
