Training Course: Basic Life Support For Marines

Training Course code: HE235648 From: 7 - 11 June 2026 Venue: Cairo (Egypt) - Holiday Inn & Suites Cairo Maadi, an IHG Hotel Training Course Fees: 4100 € Euro

Introduction

The Basic Life Support BLS for Marines training program is developed by Global Horizon Training Center to equip marines with essential theoretical knowledge to respond effectively to medical emergencies. This course covers key concepts for maintaining airway, breathing, and circulation ABCs in emergency situations, ensuring participants are well-prepared to understand and support emergency procedures in marine environments.

Objectives

- Understand the basic principles of life support and first response in a marine context.
- Recognize life-threatening conditions and their initial assessments.
- Comprehend the theoretical aspects of CPR and the use of automated external defibrillators AED.
- Identify procedures for managing choking incidents and severe bleeding.
- Familiarize themselves with marine-specific emergency response guidelines.

Target Audience

- Marines and naval personnel.
- Ship crew members and safety officers.
- First responders and emergency support teams aboard vessels.
- Individuals tasked with marine safety and response operations.

Course Outline

Day 1: Fundamentals of Basic Life Support

- Introduction to BLS: Definitions and significance.
- Recognizing life-threatening conditions.
- Overview of the ABCs of life support.

- Theoretical analysis of initial assessments.

Day 2: Cardiopulmonary Resuscitation CPR Theory

- The principles of CPR and how it sustains life.
- Understanding the chain of survival in marine emergencies.
- Detailed steps of performing CPR in theory.
- Introduction to AED and its functionality.

Day 3: Airway Management Techniques

- Theoretical approach to managing partial and complete airway obstructions.
- Response procedures for choking incidents.
- Review of techniques like back blows and chest thrusts without practical application.
- Discussions on case studies related to airway emergencies.

Day 4: Emergency Response to Bleeding and Shock

- Theoretical understanding of severe bleeding control and shock management.
- Key steps for emergency wound care and immobilization.
- Overview of treating fractures and head injuries.
- Group discussions on potential scenarios and their responses.

Day 5: Emergency Preparedness in Marine Settings

- Adapting BLS knowledge to real-life marine conditions.
- Overview of maritime safety protocols and regulations.
- Case studies focusing on marine-specific emergencies.
- Final review and knowledge assessment.
