Dubai (UAE)*

## Training Course: LOGISTICS & SUPPLY CHAIN MANAGEMENT IN THE ENERGY SECTOR

Training Course code: EW234784 From: 16 - 20 August 2026 Venue: Dubai (UAE) - Training Course Fees: 5830 € Euro

### Introduction

Blockchain technology is far surpassing its importance in cryptocurrency in the industrial sector. Combined together with the "internet of things" technology is revolutionizing the outcome of doing business. Transparency, productivity, and efficiency are the key mantras for a successful organization that can have a competitive advantage.

This Logistics & Supply Chain Management in the Energy Sector training course is aimed at both suppliers and buyers as well as internal users who need an overview of the key drivers involved when viewing logistics from the demand and supply point of view, and that delegates are able to:

- Understand the application of Blockchain and the "Internet of things" IoT in the Supply Chain in view of the energy sector
- Understand how to manage inventory critical to support the operations and apply key techniques to control lead time in the movement of goods and materials to internal users
- Find the right total cost of ownership in the acquisition of operational inventory
- Manage suppliers in meeting your key performance indicators
- Establish a better cost optimization

### Course Objectives:

Participants attending this Energy Training Centre training course will:

- Understand the insights into the developing logistics and Supply Chain in achieving competitive advantage through Blockchain technology and IOT
- Analyze the impact of logistics and supply chain management on costs and financial performance that influence the energy sector
- Learn the approaches and frameworks that can be applied to different types of Supply Chain Model
- Apply the latest thinking on supply chain strategy, planning, and execution

### Target Audience:

- Supply Chain Managers and Executives looking at thought leadership of their own supply chain

- Purchasing Executives, helping to bring them up to speed with the latest thinking, frameworks, tools, and implementation
- End-users, manufacturing managers, and operational executives who are seeking to understand supply chain integration or who need to understand the impact of supply chain decisions on their company's performance
