Conference: Business System Analysis

Conference code: CO8219 From: 27 September - 1 October 2026 Venue: Cairo (Egypt) - Conference Fees: 4100 € Euro

Introduction

Business systems analysis involves identifying, modeling, and specifying business requirements to design effective solutions. This program equips participants with essential skills to gather stakeholder requirements, develop business and data models, and write detailed system specifications. Learn to integrate analysis techniques using the Architecture Framework, ensuring comprehensive and accurate system development.

Objectives

- Understand the role of the business systems analyst
- Understand the Systems Development Life Cycle SDLC
- Define the system scope
- Identify system stakeholders
- Create a business case
- Understand and apply The Architecture Framework
- Model the business across all its dimensions: data, activities, locations, people, time and motivation
- Apply information gathering techniques
- Define functional and non-functional business requirements
- Write a business requirements specification

Target Audience

This program is designed for:

- Business Systems Analysts
- Systems Analysts and IT Analysts
- Business Analysts and Requirements Engineers
- Software Developers and Solution Architects
- IT Project Managers and Project Coordinators
- Enterprise Architects and Systems Designers
- Product Owners and Product Managers
- Quality Assurance and Testing Professionals involved in requirements validation
- Business Process Analysts and Improvement Specialists

- IT Consultants working on system development projects
- Professionals seeking to strengthen skills in requirements gathering, business modeling, and system specification
