Training Course: Applied Warehouse Management for Hospitals

Training Course code: PU234606 From: 11 - 15 May 2026 Venue: London (UK) - Training Course Fees: 5775 € Euro

Introduction

Inventories can reach millions of dollars, and for hospitals, they can represent lives. A well-organized and secure warehouse is crucial for storing, protecting, and managing both high-value inventories and life-saving materials. In this course, we will explore the best and most up-to-date methods for storing and safeguarding inventories. Additionally, we will cover the essential characteristics of a modern warehouse, focusing on ensuring record accuracy, effective cycle counting, and successful warehouse auditing. By understanding what is stored and its quantity, warehouse managers can effectively oversee operations and ensure safety, accuracy, and productivity.

Objectives

By the end of this training, participants will be able to:

- Explain the challenges, objectives, and functions of warehousing.
- Perform ABC inventory classification and cycle counting, calculating record accuracy and discrepancies.
- Describe different types of storage and material handling systems.
- Improve supervisory skills and handle warehouse staff issues more effectively.
- Enhance skills for housekeeping and safety within the warehouse.
- Measure warehouse productivity using the right Key Performance Indicators KPIs and conduct a scientific warehouse audit.

Target Audience

This training program is designed for:

- Warehouse Managers and Supervisors
- Inventory and Procurement Managers
- Supply Chain and Logistics Professionals
- Operations Managers
- Anyone interested in improving warehouse operations and inventory management

Course Outline
