Training Course: Oil & Gas Accounting & Performance Measurement

Training Course code: FI2009 From: 3 - 14 August 2026 Venue: Venice (Italy) - Training Course Fees: 6050 € Euro

Introduction

This five-day program develops an essential understanding of Oil & Gas Exploration & Production E&P accounting, reporting, and performance measurement issues and practices. It develops your ability to prepare, use and critically evaluate information on E&P activities, applying specialist industry knowledge and relevant analytical skills.

- The program is designed specifically for those who have a basic understanding of accounting but who need to understand more about accounting and financial reporting policies and practices in the upstream oil and gas industry.
- Topics covered include the successful efforts and full cost methods of accounting, the classification of assets as tangible or intangible, the unit of a production method for depreciation of capitalized costs, the testing for impairment of oil and gas assets, and accounting for removal and restoration of oil and gas facilities.
- The main requirements of Generally Accepted Accounting Principles GAAP and International Financial Reporting Standards IFRS relevant to the Oil & Gas Exploration & Production industry are examined for each major phase in the field life cycle.
- Learning throughout the course is achieved through illustrated presentations, group discussions, worked examples, exercises, and solutions, and extracts from published financial statements of international companies.
- Participants in this program gain a broader and deeper appreciation of the role of the E&P Finance Department and the context in which it operates, encouraging a more confident and proactive approach to their work, developing awareness of issues, and preparing them for increased responsibility.

Objectives

By the end of the program, delegates will learn how to:

- Develop an understanding of the accounting standards, policies, and practices used by companies in the Oil & Gas Exploration & Production industry
- Appreciate the nature and financial implications of Production Sharing Contracts and other agreements between host governments and international companies
- Examine issues and guidelines in accounting for Joint Ventures
- Identify and know how to apply international and national accounting standards most relevant to the E&P industry
- Improve the relevance and reliability of financial reports to better meet the needs of users

- Review and use publicly available information for benchmarking the business performance of companies in the E&P industry

Target Audience

- Financial accountants in oil and gas companies
- Finance managers and financial controllers
- Internal and external auditors
- IFRS and GAAP reporting specialists
- Corporate finance professionals in the energy sector
- Investment analysts
