Kuala Lumpur (Malaysia)*

Training Course: Introduction to Microservices Architecture

Training Course code: SC235222 From: 18 - 22 May 2026 Venue: Kuala Lumpur (Malaysia) - Training Course Fees: 6300
€ Euro

Introduction:

The "Introduction to Microservices Architecture" training program provides participants with a comprehensive understanding of the concepts, principles, and benefits of microservices architecture. This program is designed to equip individuals with the knowledge and skills required to design, develop, and manage microservices-based systems effectively.

Target Audience:

This program is suitable for:

- Software Developers
- System Architects
- DevOps Engineers
- IT Managers
- Project Managers
- Technical Leads
- Anyone interested in modern software architecture concepts

Objectives:

Upon completing this program, participants will be able to:

- Define and explain microservices architecture principles and concepts.
- Understand the advantages and challenges of microservices.
- Design and implement microservices-based systems.
- Utilize containerization and orchestration technologies like Docker and Kubernetes.
- Establish effective communication and coordination between microservices.
- Monitor, test, and troubleshoot microservices applications.
- Apply best practices for security, scalability, and resilience in microservices.

Outlines:

Day 1:

Introduction to Microservices Architecture

- What are Microservices?
- Comparing Microservices with Monolithic Architecture
- Key Principles of Microservices
- Advantages and Challenges
- Use Cases and Real-world Examples

Day 2:

Microservices Design and Development

- Designing Microservices
- Decomposition of Monolithic Applications
- Microservices Communication Patterns
- Containerization with Docker
- Hands-on: Creating Microservices with Docker

Day 3:

Microservices Orchestration with Kubernetes

- Introduction to Kubernetes
- Deploying Microservices on Kubernetes
- Scaling Microservices
- Service Discovery and Load Balancing
- Hands-on: Deploying Microservices with Kubernetes

Day 4:

Microservices Communication and Coordination

- API Gateways
- Asynchronous Communication
- Event-Driven Architectures
- Synchronous and Asynchronous Patterns
- Hands-on: Implementing Communication Patterns

Day 5:

Microservices Monitoring, Testing, and Best Practices

- Monitoring and Logging
- Testing Microservices
- Security in Microservices
- Resilience and Fault Tolerance
- Best Practices and Common Pitfalls
- Case Studies and Q&A

Registration form on the Training Course: Introduction to Microservices Architecture

Training Course code: SC235222 From: 18 - 22 May 2026 Venue: Kuala Lumpur (Malaysia) - Training Course
Fees: 6300 € Euro
