Training Course: Legal Aspects of Central Bank Digital Currency: Central Bank and Monetary Law Considerations

Training Course code: SC234938 From: 27 September - 8 October 2026 Venue: Cairo (Egypt) - Holiday Inn & Suites Cairo Maadi, an IHG Hotel Training Course Fees: 6300 € Euro

Introduction

This training program analyzes the legal foundations of central bank digital currency CBDC under the central bank and monetary law. Absent strong legal foundations, the issuance of CBDC poses legal, financial, and reputational risks for central banks. While the appropriate design of the legal framework will up to a degree depend on the design features of the CBDC, some general conclusions can be made. First, most central bank laws do not currently authorize the issuance of CBDC to the general public. Second, from a monetary law perspective, it is not evident that "currency" status can be attributed to CBDC. While the central bank law issue can be solved through rather straightforward law reform, the monetary law issue poses fundamental legal policy challenges.

This training course will highlight:

- The current policy goals and challenges of CBDC.
- The Concept, Design Features, and Legal Implications
