Training Course: Advanced Energy Economics and Oil & Gas Analysis

Training Course code: SC234996 From: 6 - 10 July 2026 Venue: Trabzon (Turkey) - Training Course Fees: 6300 € Euro

Introduction:

The training program is designed to enhance the participant's knowledge and skills in economics and oil and gas, with a focus on developing analytical and technical skills. It will cover the key principles of economics and their application in the oil and gas industry, including macroeconomic factors, industry dynamics, and regulatory frameworks.

Target Audience:

The training program is suitable for:

- Professionals with a background in economics, finance, or related disciplines working in the oil and gas industry or associated sectors.
- Individuals seeking to develop advanced analytical and technical skills in energy economics.
- Professionals aiming to enhance their understanding of energy markets, pricing mechanisms, and financial analysis within the energy sector.
- Personnel involved in strategic decision-making, investment analysis, and economic evaluation in the oil and gas industry.

Objectives:

- To develop a strong understanding of key economic principles and their application in the oil and gas industry
- To gain hands-on experience in analyzing economic data and trends in the oil and gas sector
- To learn about industry dynamics and regulatory frameworks in the oil and gas sector
- To develop technical skills in econometric analysis and modeling
- To network with other professionals in the field and share experiences and best practices
