

*Training Course:  
Flame Detectors: Installation, Testing, and  
Maintenance*

*20 - 24 July 2026  
London (UK)*

## Training Course: Flame Detectors: Installation, Testing, and Maintenance

Training Course code: HE235463 From: 20 - 24 July 2026 Venue: London (UK) - Training Course Fees: 6300 € Euro

### Introduction

The "Flame Detectors: Installation, Testing, and Maintenance" training program, designed by Global Horizon Training Center, provides participants with a comprehensive understanding of flame detection systems. This course covers the principles of flame detection, the different types of flame detectors, and the best practices for their installation, testing, and maintenance. Participants will gain practical skills to ensure the reliable operation of flame detection systems, enhancing safety in various industrial environments.

### Objectives

- Understand the principles and operation of different types of flame detectors.
- Learn the best practices for installing flame detectors in various industrial settings.
- Develop skills for testing and maintaining flame detection systems.
- Identify common issues and troubleshooting methods for flame detectors.
- Ensure compliance with safety standards and regulations.

### Course Methodology

This course employs a combination of lectures, hands-on exercises, case studies, and interactive discussions to provide a comprehensive learning experience. Participants will engage in practical sessions to apply theoretical knowledge and develop their skills in real-world scenarios.

### Organizational Impact

- Enhance the safety and reliability of their flame detection systems.
- Reduce the risk of fire-related incidents and improve emergency response.
- Ensure compliance with industry standards and regulations.
- Improve the knowledge and skills of their personnel in flame detection systems.
- Minimize downtime and maintenance costs through effective flame detector management.

### Target Audience

- Safety engineers and managers

- Maintenance and technical personnel
- Electrical and instrumentation engineers
- Fire protection professionals
- Anyone responsible for the installation, testing, and maintenance of flame detection systems

## Outlines

### Day 1: Introduction to Flame Detectors

- Overview of flame detection principles
- Types of flame detectors UV, IR, UV/IR, multi-spectrum
- Applications and industries
- Safety standards and regulations
- Introduction to the components of flame detection systems

### Day 2: Installation of Flame Detectors

- Site survey and risk assessment
- Selection criteria for flame detectors
- Installation guidelines and best practices
- Environmental considerations
- Hands-on installation exercises

### Day 3: Testing Flame Detectors

- Importance of regular testing
- Testing methods and procedures
- Functional and operational testing
- Calibration techniques
- Practical testing sessions

### Day 4: Maintenance of Flame Detectors

- Maintenance schedules and procedures
- Common issues and troubleshooting
- Cleaning and calibration
- Record keeping and documentation
- Maintenance exercises and case studies

#### Day 5: Advanced Topics and Case Studies

- Integration with fire alarm and suppression systems
- Advanced troubleshooting techniques
- Case studies and real-world examples
- Group discussions and Q&A
- Final assessment and review

## Registration form on the Training Course: Flame Detectors: Installation, Testing, and Maintenance

Training Course code: HE235463 From: 20 - 24 July 2026 Venue: London (UK) - Training Course Fees: 6300 € Euro

Complete & Mail or fax to Global Horizon Training Center (GHTC) at the address given below

### Delegate Information

Full Name (Mr / Ms / Dr / Eng): .....  
 Position: .....  
 Telephone / Mobile: .....  
 Personal E-Mail: .....  
 Official E-Mail: .....

### Company Information

Company Name: .....  
 Address: .....  
 City / Country: .....

### Person Responsible for Training and Development

Full Name (Mr / Ms / Dr / Eng): .....  
 Position: .....  
 Telephone / Mobile: .....
