Training Course: Accident & Incident Investigation - Risk & Root Causes

Training Course code: MM234843 From: 17 - 21 May 2026 Venue: Dubai (UAE) - Training Course Fees: 5830 € Euro

Introduction

Accidents and incidents in marine, industrial, and operational environments can have significant consequences on safety, operations, reputation, and financial performance. Effective investigation is essential not only to determine what happened, but more importantly, to understand **why it happened** and how to prevent recurrence.

This program, developed by [Global Horizon Training Center](#), provides participants with a structured and practical approach to accident and incident investigation. It focuses on identifying root causes, analyzing risks, and implementing corrective and preventive actions aligned with international best practices.

Participants will gain the knowledge and tools required to conduct professional investigations, support organizational learning, and strengthen safety and risk management systems.

Course Objectives

By the end of this program, participants will be able to:

- Understand the principles of accident and incident investigation
- Differentiate between immediate, underlying, and root causes
- Apply structured investigation methodologies
- Collect and analyze evidence effectively
- Use root cause analysis tools RCA, 5 Whys, Fishbone Diagram
- Identify risk factors and system failures
- Develop corrective and preventive action plans
- Improve safety performance and organizational learning

Target Audience

This program is designed for:

- Safety and HSE Professionals
- Marine and Offshore Supervisors
- Operations and Risk Management Personnel
- Incident Investigation Teams
- Compliance and Audit Professionals
- Managers responsible for safety and operational performance
