

*Training Course:  
Introduction to Data*

*20 - 24 July 2026  
London (UK)*

## Training Course: Introduction to Data

Training Course code: IT234613 From: 20 - 24 July 2026 Venue: London (UK) - Training Course Fees: 6300 € Euro

### Introduction

This course introduces Data Analysis using Python, MySQL, NumPy, and Pandas. It provides a practical foundation for understanding how to collect, clean, explore, analyze, and interpret data. Learners will go through the full data analysis workflow, from posing a question to communicating insights and making data-driven decisions using real datasets and hands-on exercises.

### Course Objectives

- Learn how to define and structure data analysis questions
- Understand how to clean, prepare, and wrangle raw data into usable formats
- Develop skills to explore datasets and identify meaningful patterns
- Perform statistical analysis to support insights and predictions
- Build visual understanding of data using charts and plots
- Communicate findings effectively for business or technical audiences
- Gain hands-on experience with Python, NumPy, Pandas, and MySQL for data analysis tasks

### Target Audience

- Beginners and professionals interested in starting a career in data analysis
- Data analysts who want to strengthen their skills in Python-based data analysis tools
- Students and graduates in computer science, business, or related fields
- Business professionals who need to analyze and interpret data for decision-making
- Developers and engineers who want to transition into data analysis roles
- Anyone interested in learning how to work with data using Python, NumPy, Pandas, and MySQL

### Course Outlines

#### Day 1: Problems Solved by Data Analysts

- Questions about Student Data Solution
- Investigating the Data
- Problems in the Data
- Missing Engagement Records

#### Day 2: Debugging Data Analysis Code

- Making Histograms

- Predicting Based on Many Features
- Improving Plots and Sharing Findings

#### Day 3: NumPy

- One-Dimensional Data in NumPy
- Two-Dimensional NumPy Arrays
- NumPy Arrays
- Vectorized Operations
- Multiplying by a Scalar
- Standardizing Data

#### Day 4: Pandas

- Pandas Series
- Filling Missing Values
- Plotting in Pandas

#### Day 5: Statistics

- Mean, Median and Mode
- Standard Variation, Error mean
- Calculating Correlation

## Registration form on the Training Course: Introduction to Data

Training Course code: IT234613 From: 20 - 24 July 2026 Venue: London (UK) - Training Course Fees: 6300 € Euro

Complete & Mail or fax to Global Horizon Training Center (GHTC) at the address given below

### Delegate Information

Full Name (Mr / Ms / Dr / Eng): .....  
 Position: .....  
 Telephone / Mobile: .....  
 Personal E-Mail: .....  
 Official E-Mail: .....

### Company Information

Company Name: .....  
 Address: .....  
 City / Country: .....

### Person Responsible for Training and Development

Full Name (Mr / Ms / Dr / Eng): .....  
 Position: .....  
 Telephone / Mobile: .....  
 Personal E-Mail: .....  
 Official E-Mail: .....

### Payment Method

- Please find enclosed a cheque made payable to Global Horizon
- Please invoice me
- Please invoice my company

### Easy Ways To Register

Telephone:  
+201095004484 to  
provisionally reserve your  
place.

Fax your completed  
registration  
form to: +20233379764

E-mail to us :  
info@gh4t.com  
or training@gh4t.com

Complete & return the  
booking form with cheque  
to: Global Horizon  
3 Oudai street, Aldouki,  
Giza, Giza Governorate,  
Egypt.
