Training Course: Logistics & Supply Chain Management

Training Course code: PU4039 From: 8 - 19 June 2026 Venue: Amsterdam (Netherlands) - Training Course Fees: 9450 € Euro

Introduction

The development and implementation of strategies for acquiring materials, goods, equipment, and services are critical for reducing costs and improving quality and productivity. This program explores procurement and supply chain management concepts, covering current challenges and best practices. Participants will learn how to develop high-performance purchasing and supply chain organizations through practical skills, strategic decision-making, and effective management of cost, time, and material movement.

Objectives

By the end of this program, participants will:

- Understand strategic procurement principles.
- Learn best practices in procurement and supply chain management.
- Apply techniques for cost control, time management, and effective material movement.
- Develop a functional and cross-functional view of the supply chain.
- Consider and implement Key Performance Indicators KPIs for success.

Target Audience

This program is designed for:

- Procurement Managers and Professionals
- Supply Chain Managers
- Logistics Managers
- Operations Managers
- Business Analysts focused on supply chain optimization
- Executives and Senior Managers involved in strategic decision-making for supply chain and procurement functions
- Purchasing Specialists looking to improve procurement processes and supplier management
- Anyone interested in enhancing their skills in procurement, logistics, and supply chain management

Ideal for professionals looking to optimize their organization's supply chain and improve procurement performance through practical, strategic approaches
