## Training Course: Earned Value Management for Project Performance Measurement

Training Course code: PC4071 From: 5 - 9 July 2026 Venue: Doha (Qatar) - Training Course Fees: 4725 € Euro

### Introduction

Managing technical projects effectively in today's competitive environment requires accurate control over schedule, cost, and performance. Earned Value Management EVM provides an integrated approach to measure project performance against scope, cost, and schedule baselines. By comparing actual accomplishments with planned work and budget, EVM enables early identification of schedule slippage and cost overruns, allowing timely corrective actions. This course equips participants with practical knowledge to implement EVM effectively for improved project control and decision-making.

### Course Objectives

Participants will learn to:

- Understand and implement an effective performance management system using EVM
- Apply EVM techniques to monitor project scope, cost, and schedule
- Develop control account plans CAPs and establish a project baseline
- Identify and mitigate project risks early
- Make timely decisions regarding scope, cost, and schedule parameters
- Interpret and report EVM metrics to support management decision-making

### Target Audience
